

LABEL NO. 18-2530 5/81

BEST DOCUMENT AVAILABLE

PT[®] 530 is designed for use in most Automatic Aerosol Dispensing Equipment

NOT FOR HOUSEHOLD USE

PT[®] 530 METER-MIST I with Pyrethrum

DIRECTIONS:
It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

STORAGE AND DISPOSAL:
Store in a cool area away from heat or open flame. Do not reuse empty container. Wrap container and put in trash collection.

One automatic unit should be installed for each 6,000 cubic feet of space (Equivalent to an area 22 ft. x 22 ft. x 12 ft.). When PT 530 is set to activate every 15 minutes, enough insecticide is suspended in the air after 2 hours to kill flies, gnats, mosquitoes.

Install automatic aerosol dispenser away from drafts. If air movement is constant, locate the dispenser so that the air carries the spray into the fly problem area. Placement of the dispenser above doorways often provides the best fly control, particularly when the fly population is migrating from outside.

The 8 1/2 oz. aerosol contains approximately 3,000 sprays of insecticide. Therefore, the single aerosol will operate for a total of 750 hours or about 30 days when left in continuous operation 24 hours per day and set to release every 15 minutes. The dispenser should be left in continuous operation 24 hours a day where practical. If desired, however, the dispenser can be used on a 12-hour duty cycle during daylight hours only. Under this type of operation, the 8 1/2 oz. aerosol will operate for 60 days without replacement.

NOTE:
Conditions such as air change rate, shape of area treated, humidity and temperature all affect insect activity and control — therefore one unit per 6,000 cubic feet may be considered an average requirement. Adjustments in this guideline may be necessary depending on conditions. When PT 530 is not used on a 24 hour basis, the machine will require air...
As with any method of insect control, improved performance is achieved with good sanitary practices.

Whitman's Research Laboratories, Inc., St. Louis, MO 63122

FOR MANUAL USE:
To kill flies, gnats, and mosquitoes, remove protective cap, hold container upright and away from you. Push button top or five times for each 1000 cubic feet (10'x10'x10') among spray upward and spraying in a different direction each time the button is pushed. It is unnecessary to hit flying insects directly as the air borne mist will remain suspended for some time and kill insects as they fly through it. Keep windows and doors closed for fifteen minutes after spraying.

PRECAUTIONARY STATEMENTS
Hazards to Humans and Domestic Animals

CAUTION
Harmful if swallowed. Avoid inhalation of vapor. Avoid contact with skin, eyes, or clothing. Wash contaminated skin promptly with soap and water. In case of eye contact flush with plenty of water. Get medical attention if irritation persists. Avoid contamination of food and feedstuffs.

Use 12" or more from exposed food. In Federally inspected meat and poultry plants, cover or remove exposed food and apply only when food products are not being processed. Do not use in nurseries or rooms where infants, ill or aged persons are confined.

Physical or Chemical Hazards:
Contents under pressure. Do not use or store near heat or open flame. Do not puncture or incinerate container. Exposure to temperatures above 130° Fahrenheit may cause bursting.
Do not spray on plastic, painted, or varnished surfaces.

EPA Reg. No. 498-219 EPA Est. No. 498-MO-1

For Use In:
Food Service and Preparation areas
Farms
Hotels
Homes
Kitchens
Laboratories
Lodges
Stores
Schools
Restaurants
Clubs and Storage Areas of Hospitals and Nursing Homes

Net Wt.
8 1/2 ozs.

3000 Metered Insecticide Sprays

Kills and Controls Flies, Gnats, and Mosquitoes for 30 days

Active Ingredients:	
Pyrethrins	1.00%
*Piperonyl Butoxide, Technical	10.00%
Petroleum Distillate	9.00%
Inert Ingredients:	
	80.00%
*Consists of 8.00% (butylcarbitol) (6-propylpiperonyl) Ether and 2.00% Related Compounds	

KEEP OUT OF REACH OF CHILDREN

CAUTION:

See side panel for additional precautions.
