

Perma-Dust PT[®] 240

SHAKE WELL BEFORE USING

PRECAUTIONARY STATEMENT
HAZARDS TO HUMANS AND
DOMESTIC ANIMALS

CAUTION

May cause eye irritation. Harmful if swallowed or inhaled. May be absorbed through the skin. Avoid breathing of spray mist and provide adequate ventilation of area being treated. Avoid contact with skin, eyes, or clothing. Wash thoroughly after using and before smoking or eating. Avoid contamination of food, utensils, and food preparation areas.

PHYSICAL OR CHEMICAL HAZARDS: Flammable. Do not use or store near heat, sparks or open flame. Contents under pressure. Do not puncture or incinerate container. Exposure to temperature above 130 °F may cause bursting. Do not spray on plastic, painted or varnished surfaces. Do not spray directly into any electronic equipment such as radios, televisions, computers, motors or into outlets and switches or any other location where the powdery residue may foul or short electric contacts and circuits.

ENVIRONMENTAL HAZARDS: This product is toxic to fish, birds, and other wildlife. Do not apply directly to water. Apply this product only as specified on the label. Do not contaminate water by cleaning of equipment or disposal of wastes.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

STORAGE & DISPOSAL: Do not contaminate water, food, or feed by storage or disposal.

STORAGE: Store in a cool dry area away from heat or open flame and inaccessible to children.

PESTICIDE DISPOSAL: Wastes resulting from use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL: Replace cap and discard container in trash, sanitary landfill or by other approved state and local procedures. Do not incinerate or puncture.

Shake well before use until agitator ball rattles. Before storing after use, invert container and spray until only air comes out to clear valve and spray nozzle. **Spray in Upright Position Only.**

HOW TO USE WHITMIRE CRACK & CREVICE INJECTION EQUIPMENT

Whitmire's Perma-Dust PT240 Residual is for use only with yellow injection tube and for injecting into cracks and crevices and void spaces where insects may be hiding, living, and breeding. Place injector tip 1/2" into cracks, crevices, holes and other small openings where insects may be a problem. Release approx. 1 second spray per sq. ft. in serious infestation, place spots approx. 12" apart. In light infestation or preventive treatment, place spots approx. 3 ft. apart. In long running cracks move the injector tip along the crack while spraying. Move at the rate of 1 linear foot per second in heavy infestation and 3 ft. per second in light infestation. This powder spray leaves a white residue. Should misapplication occur, wipe off visible residue. See the additional directions below for effective kill of specified insects.

CRAWLING INSECTS: COCKROACHES (WATERBUGS), EARWIGS, CRICKETS, SOWBUGS, MILLIPEDES, CENTIPEDES. Spray into hiding places such as cracks and crevices, most areas, openings around pipes and sinks, under refrigerators, behind baseboards, coffee makers, meter boxes and manholes. Spray directly on insects in these locations where possible. Repeat as necessary.

BOOKLICE, SILVERFISH & FIREBRATS: Spray cracks and crevices in baseboards, door frames, bookcases and storage areas. Spray directly on insects in these locations where possible. Repeat as necessary.

ANTS: Spray into trails, nests, and points of entry around doors, windows, structural cracks and crevices. Spray directly on insects in these locations where possible. Repeat as necessary.

GRAIN WEEVILS, FLOUR BEETLES, DRUG STORE BEETLES (in exposed adult and larvae stages) and hibernating stages of: **BOXELDER BUGS, ELMLEAF BEETLES, CLUSTER FLIES AND CLOVER MITES.** Contact as many insects as possible when treating infested areas such as cracks and crevices, in wall voids, around windows and door frames, under siding, in machinery, and in dark secluded areas. Repeat as necessary.

Localized treatment of wood-destroying insects: **CARPENTER ANTS, CARPENTER BEES AND TERMITES.** Locate source of infestation. Inject 5-10 seconds spray into insect tunnels and cavities. For Carpenter Bees seal entrance openings with small pieces of stainless steel wool after spray application.

VOLUMETRIC TREATMENT OF INACCESSIBLE VOIDS: (false ceilings, wall voids, equipment voids and attics, crawl spaces, and manholes where human contact with treated surfaces will be minimal).

For spray application with Whitmire Crack & Crevice Injection Equipment.

For exposed stages of Cockroaches, Waterbugs, Earwigs, Crickets, Sowbugs, Millipedes, Centipedes, Booklice, Silverfish, Firebrats, Ants, and Beetles. Calculate void horizontal surface area and treat at a rate of 1 second per sq. ft. Spray by placing injection tip into crack or crevice, hole, or other small opening into void space. Repeat treatment as necessary.

APPLICATIONS IN FOOD HANDLING ESTABLISHMENTS — Places other than private residences in which food is held, processed, prepared or served

FOOD AREAS — APPLICATION LIMITED TO CRACK AND CREVICE TREATMENT ONLY — Includes areas for receiving, storage, packing (canning, bottling, wrapping, boxing), preparing, edible waste storage and enclosed processing systems (trails, dairies, edible oils, syrups) Serving areas (when food is exposed and facility is in operation) also would be considered a food area

Apply in small amounts directly into cracks and crevices using injection tube in points between different elements of construction, between equipment and floors, openings leading to voids and hollow spaces in walls, equipment legs and bases where insects hide. Care should be taken to avoid depositing the product onto exposed surfaces or introducing the material into the air. Avoid contamination of food or food processing surfaces

APPLICATIONS OF THIS PRODUCT IN THE FOOD AREAS OF FOOD-HANDLING ESTABLISHMENTS, OTHER THAN AS A CRACK AND CREVICE TREATMENT ARE NOT PERMITTED

For application ideas for both food and non-food areas, follow the Whitmire Roach Location Chart and Pest Management Manuals

WHITMIRE RESEARCH LABORATORIES, INC., St. Louis, MO 63122

ONLY FOR SALE TO, USE AND STORAGE BY SERVICEPERSONS

Perma-Dust PT[®] 240

Residual Crack & Crevice System

KILLS: Cockroaches (Waterbugs), Earwigs, Crickets, Sowbugs, Millipedes, Centipedes, Booklice, Silverfish, Ants, Grain Weevils, Flour Beetles, Drug Store Beetles, Boxelder Bugs, Elmleaf Beetles, Clover Mites, Cluster Flies, Carpenter Ants, and Carpenter Bees and Termites.

For use in hospitals, supermarkets, motels, hotels, homes, apartments, buses, boats, ships, trains, trucks, planes, utilities, meat packing and food processing plants, food storage areas, restaurants and other food handling establishments, schools, warehouses, and other commercial buildings.

Authorized by USDA for use in federally inspected meat and poultry plants.

ACTIVE INGREDIENTS:

Boric Acid 20%

INERT INGREDIENTS: 80%

E.P.A. REG. NO. 499-220-AA

E.P.A. EST. NO. 499-MO-1

KEEP OUT OF REACH OF CHILDREN

CAUTION

Special precautions should be taken so that all residue will be out of reach of children or domestic animals. Avoid contamination of food and foodstuffs. See side panel for additional precautions.

STATEMENT OF PRACTICAL TREATMENT

If **swallowed:** Call a physician or poison contricenter immediately. Gastric lavage is indicated if material was taken internally. Do not induce vomiting if patient is semi-conscious, unconscious, or convulsing.

If **inhaled:** Remove victim to fresh air. Apply artificial respiration if indicated

If on **skin:** Remove contaminated clothing and wash affected areas with soap and water

If in **eyes:** Flush eyes with plenty of water. Get medical attention immediately
