PT 230 Tri-Die Insecticide Spray

499-223 1M 15 1-20-11 1041
SHAKE WELL BEFORE USE

PT[®] 230 Tri-Die

Activated Pyrethrum in Silica Aerogel

CONTACT-REPELLENT-RESIDUAL INSECTICIDE CRACK & CREVICE[®] INJECTION SYSTEM

KILLS: Cockroaches, crickets, beetles, spiders, earwigs, sowbugs, pillbugs, millipedes, centipedes, booklice, silverfish firebrats, ants, cluster flies, face flies, meal beetles, boxelder bugs, fleas, ticks, lice, bedbugs, cadellies, cheese mites, gran mites, cigarette beetles, drugstore beetles, confused flour beetles, red flour beetles, dark mealworms, yellow mealworms, sawtoothed gran beetles, flat grain beetles, granary weevils, and rice weevils in mills, elevators, and granaries. Clean up waste materials, dust, dirt, and all other debris. Thoroughly treat floors, walls, and other surfaces in bins, storage, and handling areas. Apply into cracks and crevices and other difficult to reach areas where insects may hide. Repeat as necessary.

BYWASD FORMULAS: Spot treatment for localized infestations - probe to locate galleries, drill holes and inject 5-10 seconds spray per hole into the active galleries.

POWDER POST BEETLES: Treat infested wood using injection tube. Apply small amounts directly into and around entrance holes.

VOLUMETRIC TREATMENT OF INACCESSIBLE VOIDS (false ceiling, wall voids, equipment voids and attics, crawlspaces, and man holes where human contact with treated surfaces - 4 lb per run small): For spray application with Whitmix Crack & Crevice Injection Equipment for exposed stages of cockroaches, earwigs, crickets, sawbugs, millipedes, centipedes, booklice, silverfish firebrats, ants, and beetles. Calculate void horizontal surface area and treat at a rate of one second per square foot. Spray by inserting injection tip into crack or crevice hole or other small opening into void space. Repeat as necessary.

APPLICATIONS IN FOOD-HANDLING ESTABLISHMENTS - Places other than private residences in which food is held, processed, prepared or served. (Use only when facility is not in operation.)

FOOD AREAS - APPLICATION LIMITED TO CRACK AND CREVICE TREATMENT ONLY: Includes areas for receiving, storage, parking (cranning, bottling, wrapping, boxing), pie plants, edible waste storage and enclosed processing systems (meats, dairies, edible oils, syrups). Serving areas (when food is exposed and facility is in operation) also would be considered a food area.

Apply in small amounts directly into cracks and crevices using injection tube in points between different elements of construction, between equipment and floors, openings leading to voids and hollow spaces in walls, equipment legs and bases where insects hide. Care should be taken to avoid depositing the product into exposed surfaces or introducing the material into the air. Avoid contamination of food or food processing surfaces.

APPLICATIONS OF THIS PRODUCT IN THE FOOD AREAS OF FOOD HANDLING ESTABLISHMENTS OTHER THAN AS A CRACK AND CREVICE TREATMENT, ARE NOT PERMITTED.

For application ideas for both food and non food areas, follow the Whitmix Reach Location Chart and First Management Manual.

OUTDOOR PESTS: Cockroaches, sawbugs, pillbugs, centipedes, crickets, millipedes, ground beetles, earwigs, clover mites, spiders, scorpions and ants. Clean up debris around premise. Spray into cracks around doors, windows, - for siding at foundation level, beneath guards on loading - into cracks in foundations and floors and in all other places where these pests may enter building. Repeat application as necessary.

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS WARNING

Causes eye irritation. Do not get in eyes or on clothing. Harmful if swallowed. Wash thoroughly with soap and water after handling and before eating or drinking. Avoid contamination of food and foodstuffs. Do not use in serving areas while food is exposed. **Notice to Operator:** In order to avoid any unpleasant drying of the nose and throat when dispensing PT 230 in the air confined areas or when prolonged exposure to spray mist occurs, wear a pesticide dust respirator jointly approved by the Mining Enforcement and Safety Administration (formerly the U.S. Bureau of Mines) and by the National Institute of Occupational Safety and Health under the provisions of 30 CFR Part II.

STATEMENT OF PRACTICAL TREATMENT

IF IN EYES: - Flush eyes with plenty of water. Get medical attention.

IF SWALLOWED: - Call a physician or Poison Control Center immediately. Gastric lavage may be indicated if material has been taken internally. **DO NOT INDUCE VOMITING;** vomiting may cause aspiration pneumonia.

IF INHALED: - Remove victim to fresh air. Apply artificial respiration if indicated.

IF ON SKIN: - Remove contaminated clothing and wash affected areas with soap and water.

PHYSICAL OR CHEMICAL HAZARDS

Contents under pressure. Keep away from heat, sparks, and open flame. Do not puncture or incinerate container. Exposure to temperatures above 130°F may cause bursting. Do not spray on plants. PT 230 is the is phytotoxic. Do not spray on plastic, painted or varnished surfaces. Do not spray directly into any electronic equipment such as radios, televisions, computers, motors, or into outlets and switches or any other location where the proximity resistor may lead or short electrical contacts and circuits.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal. **STORAGE:** Store in a cool dry place away from heat or open flame and inaccessible to children.

PESTICIDE DISPOSAL: Wastes resulting from use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL: Replace cap and discard container in trash, sanitary landfill or by other approved state and local procedures. Do not incinerate or puncture.

SHAKE WELL BEFORE USE: Before storing after use, invert container and spray until only air comes out in close valve and spray nozzle.

How to Use Whitmix Crack and Crevice Injection Equipment

Do not use as a spray spray. Except when used as a broadcast spray for flea control, Whitmix's PT 230 is for use only with injection tube for injecting into cracks and crevices where insects may be hiding, living and breeding. Place injection tip into cracks, crevices, holes, and other small openings where insects may be a problem. Release approx. 1 second spray per spot. In serious infestations if possible place spots 12" apart in high infestations or in preventive treatment place spots approximately 3 ft. apart in long running cracks. Move the injection tip along the crack while spraying. Move at the rate of one linear foot per second in heavy infestations and three feet per second in light infestations. See additional directions below for effective control of specific insects.

INDOOR PESTS

Crawling Pests: Cockroaches, crickets, beetles, spiders, earwigs, sawbugs, millipedes, centipedes. Spray into hiding places such as cracks and crevices, insect areas, openings around pipes and conduits, refrigerators, behind baseboards, in coffee makers, in dark storage areas and all other areas where these pests are found. Spray directly on insects at these locations where possible. Repeat as necessary.

Winged Pests: Flies, gnats. Spray cracks and crevices in basements, door frames, doorcases, and storage areas. Spray directly on insects where possible. Repeat as necessary.

A PRESCRIPTION TREATMENT: insecticide from Whitmix Research Laboratories, Inc. St. Louis, MO 63122
