HOW TO USE WHITMIRE CRACK & CREVICE INJECTION EQUIPMENT:

Do not use as an indoor space spray. See additional directions for Outdoor Use. Whitmine's PT 265A is for use indoor, only with injection.tube and for injection into cracks and crevices where insects may be hiding, living, and breading. Place injector tip 1/2" into cracks, crevices, holes and other small openings where insects may be a problem. Release approx. I second spray per spot. In serious infestation, H possible, place spots approx. 12" apart. In leght infestation or preventive treatment place spots approx. 3 ft. apart. In long running cracks, move the injector tip along the crack while spraying. Move at the rate of 1 lines floot per second in heavy infestations and 3 ft. per second in light infestations. See the additional directions below for effective control of specified insects.

INDOOR PESTS

CRAWLING INSECTS: Cockroaches (waterbugs), crickets. Spray mito hiding places such as cracks and crevices, most a reas, openings around pipes and sinks, under retrigerators, behind baseboards, coffee makers, meter boxes, and manholes. Spray directly on insects in these locations where possible. Repeat as necessary.

SILVERFISH: Spray cracks and crevices in baseboards, door frames, bookcases, and storage areas. Spray directly on insects in these locations where possible. Repeat as necessary.

ANTS: Spray into trails, nests, and points of entry around doors, windows, structural cracks and crevices. Spray directly on insects in these locations where possible. Repeat as necessary.

Localized treatment of wood-destroying insects:

CARPENTER ANTS: Locate source of infestation. Inject 5-10 seconds spray into insect tunnels and cavities. Seal entrance openings with small pieces of stainless steel wool after spray application.

APPLICATIONS IN FOOD HANDLING ESTABLISHMENTS:

Places other than private residences in which food is held, processed, prepared, or served.

FOOD AREAS — APPLICATION LIMITED TO CRACK AND CREVICE TREATMENT ONLY: Include areas for receiving, storage, packing (canning, bottling, wrapping, boxing), preparing, edible waste stor-

age and enclosed processing systems (mills, daries, edible oils, syrups). Servicing areas (when food is exposed and facility is in operation) also would be considered a food area. Apply in small amounts directly into cracks and crevices using injection tube in points between different elements of construction, between equipment and floors, openings leading to voids and hollow spaces in walls equipment legs and bases where insects hide. Care should be taken to avoid depositing the product onto exposed surfaces or introducing the material into the air. Avoid contaminution of lood or food processing surfaces.

APPLICATIONS OF THIS PRODUCT IN THE FOOD AREAS OF FOOD-HANDLING ESTABLISHMENTS, OTHER THAN AS A CRACK AND CREVICE TREATMENT ARE NOT PERMITTED.

OUTDOOR PESTS

FLIES: For outdoor use only as an aid in reducing annoyance from these insects. Spray outside surfaces of screens, doors, window frames, or whenever these insects may enter the room. Also treat surfaces around light lixtures on porches, in garages, and other places where these insects alight or congregate. Repeal as necessary.

ANTS, CRICKETS: For treatment of localized infestations of these insects in outdoor areas where there are weeds or brushy non-crop areas, spray infested areas thoroughly. For ants, thoroughly we hills and runways. Repeat applications as infestations warrant and as reinfestations occur. Servicepersons
