

Whitmire

PT[®] 140 Resmethrin Flushing & Contact Kill

FOR PROFESSIONAL USE

Whitmire

USES: For Roaches, Spiders, Waterbugs, Ants, Earwigs, Sowbugs, Centipedes, Grain Mites.

DIRECTIONS: Place valve on valve stem and press down lightly making sure tip is pointing away from face and body. Place injection tube tip in cracks, crevices, holes, and other small openings and release approximately 1 second per spot for flushing and contact kill.

Inject and spray all locations where the above insects may be a problem.

PT[®] 140 Resmethrin

This product may be used in the above locations when food is not being processed by injecting into cracks, crevices, and other locations where these insects may be a problem. Contact kill directly as many insects as possible.

PRECAUTIONARY STATEMENTS • WARNING

Hazard to human and domestic animals: Avoid inhalation of spray mist. Avoid contact with skin and eyes. Do not eat where spray may go into fish tank or drink.

Food or feed, areas of food plants, and crops should be removed or covered during treatment. All food on exposed surfaces should be covered during treatment or thoroughly cleaned before using. When using product in these areas, apply only when they are not in operation.

Physical and chemical hazards: Contains high pressure. Do not puncture or use if punctured. Store in cool, dry place. Exposure to temperature above 90°F may cause container to over-pressurize and rupture.

DISPOSAL: Empty cans should be punctured, drained, and then disposed of.

Flushing & Contact Kill Crack & Crevices Injection System
