Under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, for the pesticide registered under EPA Reg. No. 11525-35

DIRECTIONS FOR USE

SPACE SPRAY: To kill flies, mosquitoes and gnats. Close room or area to be treated. Shut off air conditioner and ventilator system. Seal all open vents. Cover all food handling surfaces and cover or remove all food. Remove fish and pets. Apply undiluted as a very fine mist space spray through manually operated equipment or with electrical and other powered applicators. Avoid staining by holding the spray nozzle at least five feet from objects. Direct the fine mist spray toward the upper corners of the room. Fill the room with a fine mist space spray at the rate of five fluid ounces per 5,000 cubic feet. Leave room closed for 1/2 hour. Ventilate thoroughly before re entering. Sweep up and destroy fallen insects.

CONTACT SPRAYS: To kill roaches, ants, earwigs, grainmites, sowbugs, spiders, and centipedes. Adjust spray to produce large wetting type spray particles. Direct spray to contact these insects in cracks and crevices in floors, baseboards, around pipes, behind cabinets and other harbourages. Spray these infested areas until thoroughly wet. Repeat as necessary.

TO KILL SPIDERS: Spray directly on these pests and use repeated applications to the webbing and all cracks and crevices which harbor spiders.

TO KILL ANTS: Spray doors, window frames, ant trails and hills.

TO KILL GRAIN INSECTS: Adults of confused flower beetles, sawtoothed grain beetles, shiny spider beetles. Remove infested grain, cereal or flour and destroy. Avoid contamination of other food and foodstuffs in the area by removing before spraying. Spray directly on exposed stages and into cracks and crevices where grain insects may be hiding. In homes, dispose of all infested products. The shelves and drawers should be cleaned, thoroughly sprayed so as to contact all pests. Use new shelf paper. Any utensils contacted with spray should be washed before using. Repeat as necessary.
