AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance with its labeling and with the Worker Protection Standard (WPS), 40 CFR part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE). The requirements in this box only apply to uses of this product that are covered by the WPS.

Worker Restricted Entry Interval (REI): Do not enter or allow worker entry into treated areas during the REI of 24 hrs unless PPE required for early entry is worn.

PPE required for early entry to treated areas that is permitted under the WPS and that involves contact with anything that has been treated, such as plants, soil, or water, is: Coveralls over short sleeved shirt and short pants; chemical resistant gloves made out of any waterproof material; chemical resistant footwear plus socks; and chemical resistant headgear for over head exposure. Notify workers of the application by warning them orally and by posting warning signs at entrances to treated areas.

NON-AGRICULTURAL USE REQUIREMENTS

The requirements in this box apply to uses of this product that are NOT within the scope of the WPS for agricultural pesticides (40 CFR Part 170). The WPS applies when this product is used to produce agricultural plants on farms, forests, nurseries, or greenhouses.

USE DIRECTIONS

Heavy Infestation: Use 0.5 fl oz per gallon of water. Spray upper and lower foliage surface of plants uniformly.

Preventative and Maintenance: Use 0.25 fl oz per gallon of water. Spray upper and lower foliage surfaces of plants uniformly.

Fungus Gnat Larvae and Shore Fly Larvae: Apply at the rate of 0.25 – 0.50 fl oz/gal as a coarse spray to all insect infested surfaces or where insects may breed. Apply with adequate water to wet soil surface thoroughly. Apply when soil is moist but not saturated. Complete coverage of insect infested area is essential.

DRENCHING DIRECTIONS

For soil borne organisms, such as Root Mealy Bugs and Root Weevils, mix at one of the above rates or at 0.125 fl oz/gal depending on the organism to be controlled and the amount of finished spray used per pot. Apply 0.5 – 2 fl oz of finished spray per inch diameter of pot. Use higher rate for lower volumes and lower concentration if greater volumes of finished spray are used. Apply when soil is drier, but do not stress plant.

PLANT SAFETY INFORMATION

All varieties of the plants listed have not been tested. When treating large numbers of plants of a single variety, treat a few plants and observe for phytotoxicity prior to full scale application.

Direct treatment to some open blooms may cause petal drop.

COMMERCIAL PEST CONTROL OUTDOORS

FLIES: Kills flies on contact. Flies must be directly contacted by spray to be effective. Use 5 – 8 fl oz/gal/1,000 ft². Spray where flies are seen and congregate (i.e. inside and outside dumpsters and other trash holding containers, trash corrals and other trash storage areas).

OUTDOOR ORNAMENTALS IN INDUSTRIAL PLANT SITES TO KILL ANTS (except Carpenter, Fire, Harvester and Pharaoh) AND CRICKETS: For treatment of localized infestations of these insects in outdoor areas which are landscaped, planted, mulched or unmaintained, spray infested areas thoroughly. For ants, thoroughly wet hills and runways. Repeat applications as infestations warrant and as reinfestations occur. Use 0.5 – 1.75 fl oz/1,000 ft² not to exceed 1 lb ai/acre.
