U.S. ENVIRONMENTAL PROTECTION AGENCY  
Office of Pesticide Programs  
Registration Division (H7505C)  
401 "M" St., S.W.  
Washington, D.C. 20460

EPA Reg. Number:

Date of Issuance:

499-433

MAY 19 1998

Term of Issuance:

Unconditional

Name of Pesticide Product:

Whitmire Avert  
TC 141 Insecticide

**NOTICE OF PESTICIDE:**

- Registration
- Reregistration

(under FIFRA, as amended)

Name and Address of Registrant (include ZIP Code):

Whitmire Micro-Gen  
3568 Tree Court Industrial Boulevard  
St. Louis, MO 63122-6682

Note: Changes in labeling differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby registered/reregistered under the Federal Insecticide, Fungicide and Rodenticide Act.

Registration is in no way to be construed as an endorsement or recommendation of this product by the Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is unconditionally registered in accordance with FIFRA sec. 3(c)(5). Once a pesticide is registered, however, it is not regarded as permanently acceptable. Registration does not eliminate the need for continual reassessment of pesticides. If the Agency determines that, at any time, additional data are required to maintain in effect an existing registration, the Agency will require submission of such data under FIFRA section (3)(c)(2)(B).

1. Make the labeling changes listed below before you release the product for shipment:
  - a. Add the phrase "EPA Registration No. 499-433".
  - b. Revise the first statement on the label to read "FOR USE BY COMMERCIAL APPLICATORS".
  - c. Change "USDA" to "Federally Inspected".
  - d. Change "Statement of Practical Treatment" to "First Aid".

TC 141

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

COCKROACHES (including carbamate, organophosphate, organochlorine and pyrethroid resistant strains): Concentrate treatment at insect activity sites. TC 141 is to be applied into locations where insects may be harboring, living and breeding. For light infestation, a minimum of 4 - 6 bait points is recommended per 100 sq. feet of treatment area. For heavy infestations, a minimum of 12 - 24 bait points is recommended per 100 sq. feet of treatment area.

Approximately 0.25 to 0.50 grams of bait per placement is suggested.

Place bait into cracks and crevices, holes and voids, pipe chases, undersides of furniture, under drain plates, in or under trash containers, hidden surfaces around sinks and storage areas, behind baseboards, around doors and windows, inside, behind and under cabinets, drawers and shelving, under and behind appliances such as, stoves, and refrigerators and in garages, attics and crawl spaces. Also apply in points between elements of construction, between equipment and floors, openings leading to voids and hollow spaces in walls, equipment legs and bases. Care should be taken to avoid depositing the product onto exposed surfaces. Avoid contamination of food, food utensils or food processing surfaces. PLACE BAIT OUT OF REACH OF CHILDREN AND PETS.

Do not use in food/feed areas of food/feed handling establishments, restaurants or other areas where food/feed is commercially prepared or processed. Do not use in serving areas while food/feed is exposed.

(Serving areas are considered areas where prepared foods are served, such as dining rooms, but exclude areas where foods may be produced or held.) In the home, all food processing surfaces and utensils must be covered or surfaces washed following treatment. Cover exposed food or remove from premises.

Examples of non-food areas in food/feed handling establishments are garbage rooms, lavatories, floor drains (to sewers), entries and vestibules, offices, locker rooms, garages, mop closets, and storage (after canning and bottling).

COCKROACHES OUTDOORS: For outdoor applications locate insects living areas, feeding points or other areas of suspected activity. Treat cracks and crevices around windows and doors, porches, screens, eaves, patios, garages, under stairways and in crawl spaces and other areas

4/4

where pests hide, such as tree holes and cracks in fences. PLACE BAIT OUT OF REACH OF CHILDREN AND PETS.

#### STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

STORAGE: Store in a tightly closed container in a cool, dry place.

PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL: Do not reuse empty container. Wrap container and put in trash.

#### PRECAUTIONARY STATEMENT HAZARDS TO HUMANS AND DOMESTIC ANIMALS

##### CAUTION

~~Harmful if absorbed through skin. Avoid contact with skin, eyes or clothing. Wash thoroughly with soap and water after handling.~~

Do not apply where children (or domestic animals) are likely to come in contact with the bait placement. No generalized treatments should be made in household areas accessible to children or pets.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish and wildlife. Do not apply directly to water. Do not apply this product to water.

PRECAUTIONS: Do not use on or contaminate fruit, vegetables or other food or feed crops.

Do not apply to humans, animals, clothing or bedding.

Do not contaminate feed or food products or food preparation surfaces, dishes, kitchen utensils and food containers.
