UNITED STATES ENVIRONMENTAL PROTECTION AGENCY  
WASHINGTON, D C 20460

Ms. Diane Ierley  
Micro-Gen Equipment Corp  
10700 Sentinel Drive  
San Antonio, TX 78217

OFFICE OF  
PREVENTION, PESTICIDES  
AND TOXIC SUBSTANCES

MAR 10 1995

Dear Ms. Ierley

Subject Request for Amendment/Conditional Registration/Child  
Resistant Packaging  
Micro-Gen Ant Reactor  
EPA Registration No. 11540-20 *Transferred to 499 459*  
Pro-Control Roach Baits  
EPA Registration No. 11540-21  
Your Letters/Submissions Dated May 4, 1994 and March 3,  
March 8, and March 10, 1995 Our Letter Dated March 3,  
1995

The Agency accepts your application for amended registration incorporating the terms and conditions stipulated in our letter dated March 3, 1995 for purposes of amending to conditional registration the registrations of the subject products.

Therefore in accordance with FIFRA Section 3(c)(7)(B) the registration of the subject product is made conditional for a period not to exceed December 31, 1997.

In your February 24, 1995 letter you committed to "change the formulation to a peanut butter base which does not crumble." A review of your product files indicate approved basic/alternate formulas containing peanut butter. Do you intend to change an approved peanut butter base formula or submit a new formulation? We acknowledge your FAX dated March 10, 1995 which certifies that the subject product's bait formulation and bait station design are identical to EPA Registration No.'s 4822-355 and 4822-356. Therefore the March 3, 1995 amendment to change the bait station is acceptable for EPA Registration No. 11540-20. Please indicate if the new bait station design also applies to EPA Reg. No. 11540-21. The labeling submitted May 4, 1994 for Reg. No. 11540-20 is acceptable. A stamped copy is enclosed for your records.

Sincerely,

George T. LaRocca  
Product Manager 13

# MICRO-GEN PRO-CONTROL Ant Baits

## FOR COMMERCIAL INDUSTRIAL AND RESIDENTIAL USE INCLUDING

Food Processing Plants Eating Establishments Food Marketing Storage Distribution Hospitals Nursing Homes Schools Office Buildings Apartments Laundries Buses Aircraft, Boats Museums and Zoos

Ants are attracted to the bait in Micro Gen PRO CONTROL Ant Baits. The bait food is carried back to the nest to kill the queen and destroy the entire colony.

### DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Break Micro Gen PRO CONTROL Ant Baits apart from the plastic frame before placement.

Place baits by ant trails or close to areas where ants are present even on food preparation surfaces or next to food. Do not place baits on food preparation surfaces when food is being handled or on utensils that are used for food preparation. Also place adjacent to walls, electrical lines, potted plants, waste receptacles, sensitive electronic equipment, inside drop ceilings and wall voids or anywhere ant problems occur. To apply baits to vertical surfaces use the enclosed stickers.

Do not use residual sprays with or near Micro Gen PRO CONTROL Ant Baits.

Ants will begin to feed - population reduction and less activity can be expected in about a week.

### FOR EFFECTIVE CONTROL

Use 3-4 baits for the average size room.

Use 6-8 baits for heavy infestations.

Bait stations are designed to be visually inspected. This allows for monitoring and timely replacement. Replacement is recommended after 3 months or when bait is almost entirely consumed (do not risk loss of control by allowing complete consumption).

Micro Gen PRO CONTROL Ant Baits are packaged in a Child Resistant Container.

### STORAGE AND DISPOSAL STATEMENTS

Do not contaminate water, food or feed by storage or disposal.

**STORAGE:** Store in a cool, dry area inaccessible to children.

**DISPOSAL:** Wrap container and put in trash collection.

## ADDITIONAL LIST OF USE SITES FOR MICRO-GEN PRO-CONTROL ANT BAITS

**GREENHOUSE (Commercial)** **HOUSEHOLD:** Closets, Basements, Attics, Recreation Rooms, Kitchens, Bathrooms, Dining Rooms, Pantry and Food Storage Shelving, **TRANSPORTATION FACILITIES:** Trucks and Trailers, Containers, Units, Railroad Cars, Recreational Vehicles, Shipping Containers, **FOOD AND FEED PROCESSING PLANTS:** Bakeries, Millers, Canneries, Dairies, Creameries, Milk Processing Plants, Feed Mills, Feed Stores, Fresh and Dried Fruit Packing and Processing, Wineries, Wire Collars, Flour Mills, Machinery, Warehouses, Bins, Elevators, Egg Processing, Candy and Confectionery Plants, Sugar Processing, Cane Mills, Dry Food Products Plants, Beverage Processing, Nut Processing, Cereal Processing, Seafood Processing, Vegetable Oil Processing, Ferrous Processing (noodles, etc.), **EATING ESTABLISHMENTS:** Food Handling and Serving Areas, Food Storage Equipment and Shelving, Food Dispensing and Vending Equipment, Food Stores, Markets, Stands, Meat and Fish Markets, Food Catering Facilities, **HOSPITALS AND RELATED INSTITUTIONS AND FACILITIES:** Do not place baits where they will come into direct contact with patients or contaminate sterile areas or instruments, Critical Premises, Hospital Patient Premises, Noncritical Premises, Barber and Beauty Shops, Morgue, Mortuary, and Funeral Home Premises.
