## Ant Control Baits

**FOR COMMERCIAL, INDUSTRIAL AND RESIDENTIAL USE INCLUDING:** Food Processing Plants, Eating Establishments, Food Marketing-Storage-Distribution, Hospitals, Nursing Homes, Schools, Office Buildings, Apartments, Laundries, Buses, Aircraft, Boats, Museums, and Zoos. Ants are attracted to the bait in Micro-Gen Ant Reactor. The bait food is carried back to the nest to kill the queen and destroy the entire colony.

### DIRECTIONS FOR USE

**IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING.**

Place baits by ant trails or close to areas where ants are present, even on food preparation surfaces or next to food. Do not place baits on food preparation surfaces when food is being handled or on utensils that are used for food preparation. Also place adjacent to walls, electrical lines, potted plants, waste receptacles, sensitive electronic equipment, insulation, ceilings and wall voids or anywhere ant problems occur. Do not use residual sprays and/or near Micro-Gen Ant Reactor Baits.

Ants will begin to feed. Population reduction and less activity can be expected within a week.

### FOR EFFECTIVE CONTROL:

Use 3 - 4 baits for the average size room.  
Use 6 - 8 baits for heavy infestations.

Bait stations are designed to be visually inspected. This allows for monitoring and timely replacement. Replacement is recommended after 3 months or when bait is almost entirely

consumed (do not risk loss of control by allowing complete consumption).  
Micro-Gen Ant Reactor Baits are packaged in a Child-Resistant Container.
