TC 234

Ant Bait Stations

TC 234 Ant Bait Stations contain a slow acting insect bait. For best results placement of the bait should be into or near insect harborage sites.

PRECAUTIONARY STATEMENTS

FIRST AID

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also call 1-800-225-3320 for emergency medical treatment information.

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Harmful if absorbed through skin. Causes moderate eye irritation. Avoid contact with eyes, skin or clothing. Wash thoroughly with soap and water after handling.

DIRECTIONS FOR USE

IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING.

STORAGE & DISPOSAL

STORAGE: Store in a cool, dry area inaccessible to children.

DISPOSAL: Wrap container and put in trash collection.

ANTS: Concentrate treatment at insect activity sites. Ants are attracted to the bait and it is carried back to the nest to kill the queen and destroy the colony. TC 234 baits are packaged in a child-resistant container.

1. Break bait stations apart from the plastic frame. [Alternate Directions: Remove bait station from container.] To stick on vertical surfaces, remove peel and stick backing on reverse side of bait station.
2. For thorough ant control, use as many bait stations as necessary (normally 3-4 stations for an average size room or 6-8 stations for a heavy infestation).
3. For best results, also place bait stations along walls, baseboards, in corners, under sinks, in

cabinets, pantries, near plumbing, electrical lines, potted plants, waste receptacles, sensitive electronic equipment, inside drop ceilings, wall voids, under and around equipment and appliances.

4. Replace bait stations when necessary, approximately every 3 months.

APPLICATIONS IN FOOD HANDLING ESTABLISHMENTS: Food handling establishments include places other than private residences in which food is held, processed, prepared or served.

FOOD AREAS: Includes areas for receiving, storage, packing (canning, bottling, wrapping, boxing), preparing, edible waste storage and enclosed processing systems (mills, dairies, edible oils, syrups). Avoid contamination of food. Use as instructed above.

AIRCRAFT CABINS: Place bait stations in suspected and active ant areas. Place bait stations in areas between elements of construction. Use up to 6 bait stations per galley and up to 3 bait stations per rest room. In cargo holds, use 6-12 bait stations per 100 sq. feet. Do not use bait stations in cockpit area.

**RE: Notification of Minor Label Revision per PR Notice 98-10 §II N
(Originally Submitted 10/29/03 – Resubmitted per Your Letter dated
12/10/03)
TC 234; EPA Reg. No. 499-496**

Dear Ms. Edwards:

Enclosed in support of this action are a completed application and one copy of revised labeling.

This letter serves as notification of the addition of a medical emergency number to the First Aid statements per PR Notice 2001-1. I am submitting this action as a notification simply to correct an oversight. Current EPA stamped accepted labeling, dated November 21, 2001, already bears the First Aid statements recommended in PR Notice 2001-1 with the exception that it did not include the following statements:

“Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also call 1-800-225-3320 for emergency medical treatment information.”

Again, this action merely corrects that oversight.

This notification is consistent with the provisions of PR Notice 98-10 and EPA regulations at 40 CFR 152.46, and no other changes have been made to the labeling or the confidential statement of formula of this product. I understand that it is a violation of 18 U.S.C. Sec. 1001 to willfully make any false statement to EPA. I further understand that if this notification is not consistent with the terms of PR Notice 98-10 and 40 CFR 152.46, this product may be in violation of FIFRA and I may be subject to enforcement action and penalties under sections 12 and 14 of FIFRA.
