Name Patricia Hodge
Company Whitmire Micro-Gen Research Laboratories
Address 3568 Tree Court Industrial Blvd.
St. Louis, MO 63122-6682

Subject: Notification: Alternate brand names
TC-248
EPA Registration Number 499-507
OPP Decision Number D478078

Dear Ms. Hodge:

The Agency is in receipt of your Application dated April 16, 2013 for Pesticide Notification under Pesticide Registration Notice (PRN) 98-10 for the product TC-248. The Registration Division (RD) has conducted a review of this request for its applicability under PRN 98-10 and finds that the action requested, Alternate brand names **Alpine[®] Cockroach Gel Bait Rotation 2 Reservoir** and **Alpine[®] Cockroach Gel Bait Rotation 1 Reservoir**, falls within the scope of PRN 98-10. The label submitted with the application has been stamped "Notification" and will be placed in our records. Please note the following:

The word "Reservoir" in both alternate brand names must start with a capital letter, and must appear as such on the label.

If you have any questions, please call me at 703-308-8291.

Sincerely,

Rita Kumar

**RE: Label Notification per PRN 98-10 adding Alternate Brand Name
TC 248
EPA Reg. No. 499-507**

Enclosed in support of this action is a completed application and one revised labeling (an electronic copy and label certification is also enclosed).

The label has been revised as follows:

1. Adding the **Alternate Brand Name** "Alpine® Cockroach Gel Bait Rotation 2 reservoir"
2. Adding the **Alternate Brand Name** "Alpine® Cockroach Gel Bait Rotation 1 reservoir"

This label has been revised via Notification of label changes per PRN 98-10 and the requirements of EPA's regulations at 40 CFR part 156. No other changes have been made to the labeling or the Confidential Statement of Formula for this product. I understand that it is a violation of 18 U.S.C. Sec. 1001 to willfully make any false statement to EPA. I further understand that if the amended label is not consistent with the requirements of 40 CFR part 156, this product may be in violation of FIFRA and I may be subject to enforcement action and penalties under sections 12 and 14 of FIFRA.

Thank you for your assistance in this matter. Please don't hesitate to contact me at 636-861-4272 or, via e-mail at patricia.hodge@basf.com, should you have any questions or require additional information regarding this action.

Sincerely,

Patricia Hodge
Product Regulations Specialist

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Harmful if swallowed or absorbed through the skin. Avoid contact with skin, eyes or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum or using tobacco. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARDS

Do not apply directly to water. Do not contaminate water by cleaning of equipment or disposal of equipment washwaters.

[Text in this color is currently print-restricted from the marketplace label.]

PHYSICAL OR CHEMICAL HAZARDS

Do not store or use near heat or open flame. Do not use this product where a possibility of a shock hazard exists.

DIRECTIONS FOR USE

IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING.

READ ENTIRE LABEL. Use strictly in accordance with Precautionary Statements and Directions and with applicable state and federal regulations. Apply bait only in areas inaccessible to children and pets.

GENERAL INFORMATION

HOW TC 248 WORKS

- TC 248 cockroach gel bait contains a powerful food based attractant.
- The attractant draws roaches to the bait.
- Roaches eat the bait, then crawl away to die.

USE RESTRICTIONS

- Keep out of sunlight or excess heat.
- Do not apply bait to surfaces which may reach excessive temperatures. Examples include, but are not limited to: portions of stoves, ovens, grills, fume hoods, steam tables, toasters, fryers, dishwashers and hot water pipes.

SPOT TREATMENT

To apply gel, remove cap from tip of applicator tube. Apply gel in a 3 – 6 mm diameter spot (0.25 – 0.50 g). Approximately 10 spots per 100 ft² are recommended for use under conditions with low to moderate infestation. For more severe infestations, approximately 20 spots per 100 ft² are recommended. Apply many spots in areas of roach traffic and suspected harborage. Numerous small application spots are preferable to fewer larger application spots. Do not treat food preparation surfaces. Do not apply gel to areas that have been recently sprayed with a repellent insecticide. Do not spray insecticide products over gel placements as this may make gel repellent and reduce its effectiveness. Do not place treatments in locations where routine cleaning might remove bait or transfer bait to food or food preparation surfaces. This product will stick to surfaces that are not dusty or greasy. Reapply if gel placements are no longer visible and/or reinfestation occurs. Replace cap when finished dispensing gel. Use paper towel to remove unwanted bait placements and then discard in trash.

CRACK & CREVICE® TREATMENT

This product can be applied as spots or as a line along cracks and crevices. Gel bait should be applied directly into cracks and crevices where insects hide. Place the applicator tip directly into cracks and crevices and deposit gel in small spots or in a continuous bead. Bait should be in the void area and not on open or exposed surfaces.

FOOD HANDLING ESTABLISHMENTS

Application within food areas of food handling establishments is limited to cracks and crevices where insects hide. To apply gel, remove cap from tip of applicator tube. Apply gel in a 3 – 6 mm diameter bead (0.25 – 0.50 g). Approximately 10 bait placements per 100 ft² are recommended for use under conditions with low to moderate infestation. For more severe infestations, approximately 20 bait placements per 100 ft² are recommended. Numerous small applications are preferable to fewer larger applications. Bait should not be used in open areas or on surfaces where contamination of food or food handling equipment may occur. Replace cap when finished dispensing gel. Reapply gel if previous applications are no longer visible and/or reinfestation occurs.

APPLICATIONS IN AIRCRAFT

Application within passenger areas of aircraft is limited to Crack & Crevice treatment only. Apply TC 248 in areas between elements of construction (such as areas under sinks, openings around pipes, under shelving, where shelving meets other shelves or the wall, area between and around microwaves, where support braces attach to the main structure and where seats are attached to the floor). Apply 10 – 20 bait spots per 100 ft² as described above.

Complete Label

v3.1 (4/16/2013; pah)

[Text in this color is currently print-restricted from the marketplace label.]

Do not apply bait to areas where food, utensils or food preparation surfaces may become contaminated. Do not apply bait to areas that are routinely washed such as cracks and crevices in tops of tables, food preparation and food holding surfaces as bait may be removed by washing. Care should be taken to avoid depositing gel onto exposed surfaces. If gel contacts an exposed surface, remove gel and wash exposed surface. During follow-up visits, inspect bait placements and reapply when previous applications are no longer visible and/or reinfestation occurs. Do not apply any bait in cockpit area.

OUTDOOR USE

Use for control of cockroaches. Inject into cracks and crevices around windows and doors, porches, screens, eaves, patios, garages, under stairways and other areas adjacent to structures where cockroaches may find harborage.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage and disposal.

PESTICIDE STORAGE: Store in a cool dry place away from heat or open flame and inaccessible to children.

PESTICIDE DISPOSAL: Wastes resulting from the use of this product must be disposed of on site, according to label directions, or at an approved waste disposal facility.

CONTAINER DISPOSAL: Non-refillable container. Do not reuse or refill this container (reservoir). Empty container (reservoir) by using the product according to label directions. Offer empty container (reservoir) for recycling, if available, or place in trash if allowed by state and local regulations. If container (reservoir) is partly filled, contact your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.
