Re: Label Notification – Addition of Alternate Brand Name per PR Notice 98-10 TC 303, EPA Reg. No. 499-540

Enclosed in support of this action is a completed application (EPA Form 8570-1) and two copies revised labeling (one is highlighted for easy reference and review, the other is "clean"). The label is also being submitted in electronic format on a CD (with a signed label certification statement).

We are adding the alternate brand name, Prescription Treatment® brand Alpine® Flea Insecticide with IGR.

The enclosed label also includes the revisions required by EPA with the Notice of Pesticide Registration dated December 13, 2010.

This notification is consistent with the provisions of PR Notice 98-10 and EPA regulations at 40 CFR 152.46, and no other changes have been made to the labeling or the confidential statement of formula of this product. I understand that it is a violation of 18 U.S.C. Sec. 1001 to willfully make any false statement to EPA. I further understand that if this notification is not consistent with the terms of PR Notice 98-10 and 40 CFR 152.46, this product may be in violation of FIFRA and I may be subject to enforcement action and penalties under sections 12 and 14 of FIFRA.

Final printed labeling bearing the alternate brand name noted herein will be submitted to the PM in the near future.

Thank you for your assistance in this matter. Please do not hesitate to contact me at 636-861-4223 or, via electronic mail at <u>dana.thomas@basf.com</u>, should you have any questions or require additional information.

This product kills fleas and prevents flea infestations for a full season. Adult fleas may be seen in the treated areas when brought in on infested animals or when adults emerge from pupal cases; however, populations will not develop in the treated area.

In transportation equipment, certain plastics may be whitened or dulled. Apply only to carpets and cloth upholstered areas, or test an inconspicuous area before treating.

NOTICE: This product has been tested on several types of carpet, fabric and other household furnishings without adverse affects. In a few instances, waxed surfaces have been whitened or dulled. Holding the can 36" away from the target surface normality prevents any whitening from occurring. Because of the wide variety of floor types and finishes, treat a small inconspicuous area before treating the entire area. Avoid contact with antique finishes.
