TAT ROACH BAIT
KILLS: Roaches, Waterbugs, Palmetto Bugs

READ INSTRUCTIONS BEFORE PRESSING IN SEMI-PERFORATED HOLES

PRECAUTIONARY STATEMENTS
Hazards to Humans & Domestic Animals

CAUTION: Harmful if swallowed. Avoid contact with skin, eyes or clothing. Wash thoroughly after handling. Place bait trays [traps] in areas inaccessible to children and domestic animals. Do not contaminate feed, food products, food preparation surfaces, dishes, kitchen utensils or food containers.

Statement of Practical Treatment

If On Skin, wash with soap and water. **If in eyes,** rinse thoroughly with clean water. **If swallowed,** drink one or two glasses of water and induce vomiting by touching back of throat with finger. **Note to Physicians:** Atropine sulfate is antidotal and should be administered only if symptoms appear.

Environmental Hazards

This product is toxic to fish, birds and wildlife.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

READ ENTIRE LABEL. USE STRICTLY IN ACCORDANCE WITH LABEL PRECAUTIONARY STATEMENTS AND DIRECTIONS.

On the sides of the can you will find several indented sections. Simply apply pressure with key until they open (see illustration). Place the bait trays [traps] where you have noticed the infestation of roaches. TAT Roach Bait will take care of the rest. For best results, use 4-6 bait trays [traps] per 100 square feet of surface area to be treated. More bait trays [traps] may be used if infestation is great.

For a total control program, use in conjunction with TAT Liquid Aerosol Jet Stream.

EFFECTIVE -- CLEAN -- ECONOMICAL

For continuous good results, check regularly and replace every four weeks or as needed. Place bait trays [traps] where roaches are numerous -- on shelves, in drawers, baseboards, under sinks, stoves and refrigerators, in bathrooms, etc. As roaches are night feeders, they enter bait tray [trap] when it's dark. Death occurs soon after feeding. They leave bait tray [trap], return to hiding places and die.

~~Alternate Directions for Pelleted Form:~~

~~To be applied only by certified maintenance personnel or PPO/PCOs. Locate application site closest to the roach pathway in the kitchen, pantry, bathroom etc. Use a slightly larger drill bit than the diameter of the pellet, drill a hole through the sheet rock wall at least 24" above the floor level. Insert one or three pellets (depending upon the infestation) per hole every four to eight months or as needed. Write the date of application and applicator's certification number on the sticker, remove the peel ply and seal the hole with the sticker. Remove old sticker prior to subsequent applications.~~

STORAGE AND DISPOSAL: Store in a cool dry place preferably in a locked storage area. Keep pesticide in original containers. Do not reuse empty containers. Wrap and dispose of empty container in trash.

NOTICE: Buyer assumes all responsibility for safety and use not in accordance with directions.

MONEY BACK GUARANTEE: If TAT Roach Bait does not provide satisfactory results, return all [number] bait trays [traps], in their original package, to Walco-Linck.
