VIGORO

EndoPest

3-WAY GARDEN DEFENSE

HOW TO USE

Dusting is most successful when the atmosphere is quiet and the temperature low. Early morning or late evening is best. All exposed parts of plants should be lightly coated with a film of EndoPest as soon as insects are observed or suspected.

Repeat application frequently to prevent reinfestation from hatching insect eggs or migrating insects. Best protection against fungus diseases is afforded by regular dusting, particularly during cool moist periods.

ACTIVE INGREDIENTS

Rotene 1.25%
Total ether extractives of Rotene bearing roots 3.75%
Phenothiazine 25%
Zinc Dimethylthiocarbamate 4.00%
Sulphur 15.00%

INERT INGREDIENTS 75.75%
