CUPRINOL

No. 10

WOOD PRESERVATIVE

THIS IS THE EXTRA STRENGTH WOOD PRESERVATIVE WHICH IS WORLD FAMOUS AMONG BOAT OWNERS. IT PROLONGS THE LIFE OF ALL WOOD BY PROTECTING AGAINST ROT, TERMITE DAMAGE, MILDEW, WARPING AND SWELLING.

Cuprinol® Green No. 10 contains a powerful copper fungicide-insecticide and water repellents for three-way protection. Its extra strength is important for wood used in contact with soil, water and concrete. Apply Cuprinol liberally to fence posts, poles, foundation sills, docks, boats and all wood exposed to moisture or weather. Wood should be free of bark, dry and well-seasoned. Exceeds Federal Specification TT-W-00572b.

The green of Cuprinol No. 10 is from the copper fungicide and is not a lasting stain. Color will fade within a matter of months, and may bleed through lighter colors of stains and paints. Use Cuprinol® Clear No. 20 for wood above ground level and under paint.

LIMITED WARRANTY

The manufacturer will replace this product if, within 1 year of the date of purchase, it is shown to be defective.

THE MANUFACTURER'S LIABILITY UNDER ANY WARRANTY, WHETHER EXPRESS OR IMPLIED, IS LIMITED SOLELY TO REPLACEMENT OF THE PRODUCT AND DOES NOT INCLUDE LABOR OR OTHER CONSEQUENTIAL DAMAGES.
