

DIRECTIONS

2.0% CIODRIN® Insecticide Animal Spray Solution is a specifically prepared ready to use insecticide suitable for use in conventional hand, power, or automatic spray equipment. For the control of certain insects attacking animals, apply in accordance with State and Federal recommendations.

USE	INSECT	DOSAGE	DIRECTIONS FOR APPLICATION
Cattle, Dairy & Beef	Flies (House Fly, Horn Fly, Stable Fly, Face Fly)	2.0% Solution	Apply a light application 1 to 2 oz. per head as a fine mist. Spray to thoroughly cover all parts of the animal, including the legs. Initially apply daily until fly populations are brought under control. Thereafter, apply as needed. If fly populations build up during warm humid weather, increase frequency of applications until flies brought under control. Do not use in excess of 2 oz. per day.
Backrubbers & Face rubbers	(Horn, & Face Flies)	1% Solution	Dilute this mixture with an equal part of Kerosene or Diesel Oil to make a 1% Ciodrin Solution. Use in all types of livestock oilers, refill when necessary.

Do not apply regularly to calves under 6 months of age. Brahman cattle should not be treated as they may show hypersensitivity to organic phosphates.
