

SPA-85

CHLORINATING TABLET 1"

Active Ingredient:	
Trichloro-s-triazinetriene	99%
Inert Ingredients:	1%
Available Chlorine	89%

Keep Out of Reach of Children

DANGER!

See First Aid Statement and Additional Precautions on Side Panel.

Net Wt. 4 lbs (1.8 Kg)

EPA Registration No. 524-336

EPA No. 524-4-1

PRECAUTIONARY STATEMENTS

Hazard To Humans and Domestic Animals

DANGER: Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Wear goggles or face shield, rubber gloves and use clean, dry utensils when handling. Irritating to nose and throat. Avoid breathing dust or fumes. Remove and wash contaminated clothing before reuse.

FIRST AID (PRACTICAL TREATMENT)

If swallowed: Feed large amounts of milk and/or water and induce vomiting. Call a physician immediately.

If on Skin: Brush off excess chemical and flush skin with cold water for at least 15 minutes. If irritation persists, get medical attention.

If in Eyes: Flush with cold water for at least 15 minutes. Get immediate medical attention.

If Inhaled: Remove person to fresh air. Get immediate medical attention.

PHYSICAL AND CHEMICAL HAZARDS

STRONG OXIDIZING AGENT: Use only clean, dry utensils. Mix only with water. Do not add this product to any dispensing device containing remnants of any other product. Contamination with moisture, dirt, organic matter, or other chemicals (including pool chemicals) may start a chemical reaction with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion. Avoid any contact with flammable or burning material, such as a lighted cigarette.

ENVIRONMENTAL HAZARDS

This product is toxic to fish. Do not discharge into lakes, streams, ponds, or public waters unless in accordance with an NPDES Permit. For guidance contact the regional office of EPA.

STORAGE AND DISPOSAL

Keep product dry in tightly closed container when not in use. Store in a cool, dry, well-ventilated area away from heat or flame. Do not reuse empty container. Rinse empty container thoroughly with water to dissolve all material. Rinse discarding. Place in a trash collection or dispose in approved landfill area, or bury in a safe place. **IN CASE OF CONTAMINATION OR DECOMPOSITION,** do not reuse container. If possible isolate container in open air or well-ventilated area. Flood with large volume of water, avoid breathing fumes. Dispose of contaminated material in an approved landfill or bury in a safe place.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

FOR CONTROL OF BACTERIA AND ALGAE (OUTDOORS) IN SPAS OPERATED CONTINUOUSLY

1. Before bathing, test water pH, chlorine residual and alkalinity using suitable test kit. Adjust chlorine residual to 3 ppm. Use a chlorine stabilizer, especially outdoors to prolong chlorine residual. Maintain pH of water between 7.2 and 7.6 and total alkalinity between 125 and 175 ppm with the addition of sodium bicarbonate or diluted muriatic acid.
2. This product does not affect pH or alkalinity of water. One tablet (1/2 oz.) per 1000 gal. of water gives 3 ppm of chlorine. To use apply sufficient tablets to the feeder to maintain the chlorine level at 1 to 3 ppm. Bathing can start when the chlorine level is between 1 and 3 ppm.
3. Test often and keep chlorine residual above 1 ppm by adjusting output from feeder to bather load.
4. Weekly, superchlorinate water to 5 or 6 ppm using chlorinating granules as recommended on the label directions. Usually 2 level tablespoons per 1000 gal. of water gives 6 ppm chlorine. Draining and cleaning of spa is recommended whenever the water becomes difficult to manage or chlorine stabilizer goes over 100 ppm as measured with a suitable cyanuric acid test kit. Avoid use of products such as body lotions that consume chlorine.
