

SUPPLEMENTAL LABELING

READ AND FOLLOW THE ENTIRE LABEL FOR FALLOWMASTER® BEFORE PROCEEDING WITH THE USE DIRECTIONS CONTAINED IN THIS SUPPLEMENTAL LABELING.

"Label" as used in this supplemental labeling refers to the label booklet for Fallowmaster herbicide and this supplemental.

**FALLOWMASTER
Herbicide by Monsanto**

EPA Reg. No. 524-390

FOR DISTRIBUTION AND USE ONLY WITHIN SOUTH DAKOTA.

FOR NONSELECTIVE CONTROL OF LISTED ANNUAL WEEDS IN SMALL GRAIN CROPPING SYSTEMS.

Keep out of reach of children.

DANGER!

In case of emergency involving this product, Call Collect, day or night, (314) 694-4000

®Fallowmaster is a registered trademark of Monsanto Company.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with the labeling.

This label must be in the possession of the user at time of the herbicide application.

ANNUAL WEED CONTROL

WEEDS CONTROLLED

Refer to the "RECOMMENDED RATES AND WEEDS CONTROLLED" section of the Fallowmaster label for rate recommendations and annual weeds controlled.

APPLICATION INSTRUCTIONS

For ground applications, use 3 to 5 gallons of water per acre.

For aerial applications, use 1 to 3 gallons of water per acre.

ATTENTION

AVOID DRIFT. EXTREME CARE MUST BE USED WHEN APPLYING THIS PRODUCT TO PREVENT INJURY TO DESIRABLE PLANTS AND CROPS.

Do not allow the herbicide solution to mist, drip, drift, or splash onto desirable vegetation since minute quantities of this herbicide can cause severe damage or destruction to the crop, plants or other areas on which treatment was not intended. The likelihood of injury occurring from the use of this product is greatest when winds are gusty or in excess of 5 miles per hour or when other conditions, including lesser wind velocities, will allow spray drift to occur. When spraying, avoid combinations of pressure and nozzle type that will result in splatter or fine particles (mist) which are likely to drift. **AVOID APPLYING AT EXCESSIVE SPEED OR PRESSURE.**

NOTE

- To prevent injury to adjacent desirable vegetation appropriate buffer zones must be maintained.
- Adjust boom height on ground equipment to prevent streaked, overlapped or uneven applications. Coarse sprays are less likely to drift; therefore, do not use nozzles or nozzle configurations which dispense spray as fine spray droplets.
- In aerial applications, do not angle nozzles forward into the airstream and do not increase spray volume by increasing nozzle pressure.
- Ensure uniform application. Use appropriate marking devices when applying herbicides by air.
- Avoid spraying when weeds are subject to moisture stress, when dust is on foliage, or when straw canopy covers the weeds.
- Thoroughly wash aircraft, especially landing gear, after each day of spraying to remove residue of this product accumulated during spraying or from spills. **PROLONGED EXPOSURE OF THIS PRODUCT TO UNCOATED STEEL SURFACES MAY RESULT IN CORROSION AND POSSIBLE FAILURE OF PART. LANDING GEAR ARE MOST SUSCEPTIBLE.** The maintenance of an organic coating (paint) which meets aerospace specification MIL-C-38413 may prevent corrosion.
