DIRECTIONS FOR USE

It is a violation of Federal law to use this product in any manner inconsistent with its labeling.

This labeling must be in the possession of the user at the time of herbicide application.

See "GENERAL INFORMATION" and "MIXING, ADDITIVES AND APPLICATION INSTRUCTIONS" sections of the label booklet for Degree™ herbicide for essential product performance information.

RECOMMENDATIONS

Following soybean harvest, apply to soybean stubble after September 30, when the sustained soil temperature at 4-inch depth is less than 55°F, but before ground freezes. Use on medium- and fine-textured soils with greater than 2.5 percent organic matter. Only corn may be planted the following spring. Ground may be tilled before or after

application. Do not exceed 2-inch incorporation depth if tilled after application.

If a spring application is made, the total rate of the fall plus spring application must not exceed the maximum labeled rate for corn grown on that soil.

Read the "LIMIT OF WARRANTY AND LIABILITY" in the label booklet for Degree herbicide before using. These terms apply to this supplemental labeling and if these terms are not acceptable, return the product unopened at once.
