**Subject: Roundup UltraMAX II Herbicide (EPA Reg. No. 524-537)
Weed Resistance Management Supplemental Label**

Dear Mr. Tompkins:

On 30-Oct-2003, EPA approved Monsanto's proposed label direction for weed resistance management procedures for Roundup WeatherMAX Herbicide (524-537), relating to PR Notice 2001-5. Copies of EPA's letter and the stamped label are enclosed for your reference.

In the course of discussion at the 14-Jul-2003 meeting on this subject, EPA informed Monsanto that it would be acceptable to extend this same label language to other Monsanto glyphosate registrations via Notification. Accordingly, Monsanto is notifying the Agency that we will use this same label text for another product on the 524-537 registration, Roundup UltraMAX II Herbicide. Enclosed for the Agency's records are five (5) copies of draft labeling.

This notification is consistent with the provisions of PR Notice 98-10 and EPA regulations at 40 CFR§ 152.46, and no other change, besides the addition of the attached text, have been made to the labeling or the confidential statement of formula of this product. I understand that it is a violation of 18 USC Sec. 1001 to willfully make any false statements to the EPA. I further understand that if this notification is not consistent with the terms of PR Notice 98-10

and 40 CFR 152.46, this product may be in violation of FIFRA and I may be subject to enforcement actions and penalties under sections 12 and 14 of FIFRA.

Information on Weed Resistance

GROUP	9	HERBICIDE
-------	---	-----------

Glyphosate, the active ingredient in this product, is a Group 9 herbicide. Target site resistance to Group 9 herbicides is rare. Although rare in occurrence, any weed population may contain plants naturally resistant to Group 9 herbicides. Weed species resistant to Group 9 herbicides may be effectively managed utilizing another herbicide from a different Group or using other cultural practices.

Weed resistance management recommendations for Group 9 herbicides are:

- Ensure optimum weed control by making applications at the right time (correct weed size) and

utilizing the recommended label rate for the most difficult to control weed in your field.

- Base decisions on local needs and use the tool(s) necessary to obtain optimum weed control and minimize weed escapes.
- Avoid tank-mixtures that reduce this product's efficacy (through antagonism) or which encourage rates of this product below the label recommendations.
- Scout treated weed populations for escapes 2-4 weeks after application.
- Report any incidence of repeated non-performance of this product on a particular weed to the local retailer, county extension agent, or Monsanto representative.

Read the "LIMIT OF WARRANTY AND LIABILITY" in the label booklet for Roundup UltraMAX II herbicide before using. These terms apply to this supplemental labeling and if these terms are not acceptable, return the product unopened at once.
