

# BAY-O-CIDE

## RESIDUAL INSECTICIDE

EPA Reg. No. 527-80-AA

### FOR INSTITUTIONAL AND INDUSTRIAL USE ONLY

Bay-O-Cide is a ready-to-use and highly effective formulation for use in groceries, food warehouses and other food establishments.

Bay-O-Cide kills the following insects including those resistant to certain chlorinated hydrocarbon and phosphate insecticides: Cockroaches, waterbugs, silverfish, ants, flies, crickets, gnats, spiders; the accessible stages of cadelles, granary weevils, rice weevils, Indian meal moths, Mediterranean flour moths, rust red flour beetles and saw-toothed grain beetles.

#### Active Ingredients:

Pyrethrins	0.05%
Piperonyl Butoxide, technical*	0.10%
N-Octyl Bicycloheptene Dicarboximide	0.17%
o-Isopropoxyphenyl Methylcarbamate**	1.00%
Refined Mineral Oil	83.63%

Inert Ingredients: 15.05%

\*Consists of 0.08% (butylcarbityl) (6-propylpiperonyl) ether and 0.02% related compounds.

\*\*BAYGON®, U. S. Pat. No. 3,111,539

#### DIRECTIONS

**For use only by, or under supervision of trained personnel.**

Apply with a low pressure sprayer equipped with coarse spray nozzle or paint on with ordinary paint brush. Avoid excessive run-off. For thorough control treat adjacent exposed surfaces where insects travel. Repeat application as often as necessary.

**FOOD HANDLING ESTABLISHMENTS** — Places other than private residences in which exposed food is held, processed, prepared or served.

#### FOOD AREAS—APPLICATION LIMITED TO CRACK AND CREVICE TREATMENT ONLY

Includes areas for receiving, storage, packing (canning, bottling, wrapping, boxing), preparing, edible waste storage, enclosed processing systems (mills, dairies, edible oils, syrups), and serving areas (when food is exposed and facility is in operation).

Apply in small amounts directly into cracks and crevices using equipment capable of delivering a pin stream of insecticide into cracks between different elements of construction, between equipment and floors, openings leading to voids and hollow spaces in walls, equipment legs and bases where cockroaches, waterbugs, silverfish, ants, flies, crickets, gnats, spiders, cadelles, weevils, Indian meal moths, Mediterranean flour moths, rust-red flour beetles and saw-toothed grain beetles hide. NOTE: De-energize prior to application to conduits, motor housings, junction or switch boxes and allow time for evaporation of insecticide before reuse.

Care should be taken to avoid depositing the product onto exposed surfaces or introducing the material into the air. Avoid contamination of food or food processing surfaces.

**APPLICATIONS OF THIS PRODUCT IN THE FOOD AREAS OF FOOD HANDLING ESTABLISHMENTS, OTHER THAN AS A CRACK AND CREVICE TREATMENT ARE NOT PERMITTED.**

**NON-FOOD AREAS** — Includes entries and vestibules, offices, lavatories, locker rooms, machine rooms, boiler rooms, garbage rooms, garages, floor drains (to sewers), mop closets and storage areas (after canning or bottling).

Apply to cracks, crevices, corners and baseboard areas; around cabinets, window sills, drains and pipes; to surfaces behind and beneath sinks, lockers, tables, pallets; and to similar areas where insects hide or through which they may enter.

#### CAUTION: KEEP OUT OF REACH OF CHILDREN.

Harmful if swallowed, inhaled, or absorbed through skin. Avoid contact with skin, eyes or clothing. For skin contact, wash with soap and water. For eyes, flush with water. Avoid inhalation of spray — respirator or mask is advised. Use with adequate ventilation. Note to physician: Atropine sulfate is antidotal. Remove pets, birds, and fish from areas to be treated. **WARNING — FLAMMABLE! KEEP AWAY FROM HEAT OR OPEN FLAME.** Do not smoke while spraying. Do not reuse empty containers. Destroy by perforating or crushing. Discard in a safe place away from water supplies.

ACCEPTED

APR 10 1975

Under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, this pesticide is registered for use in bakeries, wholesale
