

washing particles on the leaves).  
DO make two applications 5-7 days apart.  
DO apply at Scotts Spreader (Standard or Automatic Model) setting 6½ (treats 5,000 sq ft)  
For fast action on mature matted crabgrass before seeding in fall. (Treats 2,500 sq ft)

6½  
9½

(mow lawn first in such situations)  
DO NOT use on new lawns until after the third mowing  
DO NOT use in St. Augustine, centipede, bahia, or carpetgrass lawns  
DO NOT plant grass seed for 48 hours after using this product  
DO NOT apply with a rotary-type spreader.

### What to expect

This product needs time to work. It is designed to give slow, steady, controlled action. Results may be delayed by cold or dry weather. Susceptible weeds first turn pale green, then yellow, and die. It is not necessary to remove dead weeds. They will eventually disintegrate and disappear.

Only weeds growing at the time of application will be eliminated. Weed seeds in the soil are not affected.

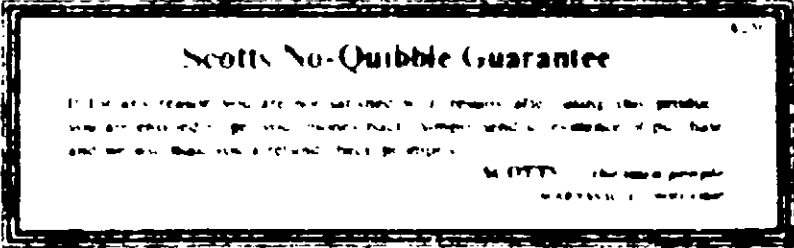

In hot weather good grasses or dichondra may brown temporarily but they will recover. Dallisgrass and other paspalums are particularly difficult to control in California.

Rain, sprinkling, mowing or heavy traffic within 24 hours reduces effectiveness by removing granules from the leaves. Repeat application may then be needed.

A few weeds may be resistant to control. If this happens, please forward specimens so we can identify them and advise you further.

### Free bulletin-service

A free bulletin service is available for lawn care problems. Write to: Scotts Lawn Care, Dept. 6250, P.O. Box 1200, Kenilworth, N.J. 07033. Please include name, address, and a description of the problem.

1. Destroys patches of lawn weeds or weedy grasses which do not respond to selective controls. Two applications five days apart may be needed.
2. Destroys vegetation in driveways, walks, gravelled paths. Resistant plants with deep root systems will need followup applications whenever new growth develops.

### Shake directly onto moist foliage

If granules are washed off foliage before 24 hours, effectiveness is reduced.

**CAUTION:** Keep children and animals off treated areas until after rain or watering. Avoid breathing dust. Harmful if swallowed. Avoid contact with skin and eyes. Wash thoroughly with soap and water after handling. Avoid contamination of feed, foodstuffs or fish ponds. Not for use on vegetable gardens.
