How to use

KWIT (R) BRAND

LAWN INSECT CONTROL FOR CHINCHBUGS, SOD WEBWORMS, CLOVER MITES, LEAF HOPPERS

When to apply

If insects are already at work, as evidenced by yellowing and browning of grass similar to drouth damage, apply KWIT immediately.

<u>As a preventive program</u>, apply as soon as temperatures are consistently in the 80's or higher. Repeat at two month intervals.

Apply to dry lawn foliage.

How to apply

.

Use Scotts Spreader setting 9½

Apply over full lawn area. Overlap spreader wheel tracks slightly so no strips (S are missed. Any untreated portion provides a haven for insects.

(Spreader photo)

*

. . .

ŧ

Water throoughly after application.

(5 of 5)

What to expect

Damaging activity of insects ceases within hours. Full control of chinchbugs may not be evident for approximately two weeks.

- 2 -

Grass seed can be planted any time in relation to KWIT applications.

Precautions

Before permitting children or pets on treated area, let lawn foliage dry off after watering in.

٠

Do not apply on dichondra lawns.

Guaranteed to satisfy

· •

Scotts, in its 99th year, continues to guarantee satisfaction or your money back.
