Directions for use

- It is a violation of federal law to use this product in a manner inconsistent with its labeling.
- Do not apply in winter (December, January or early February).
 - Provide protection by watering.
 - Make two applications (6 to 8 weeks apart) to control the following weeds when they are annual, biennial, or perennial:
 - Prevents spotted spurge and crabgrass.
 - To prevent spurge and crabgrass, both applications must be made before mid-March in Southern California, late March in the Interstate 15 and mid-April in Northern California.
 - Do not apply at Scotts Spreader (Standard, Automatic or Precision Flow Control Model) setting **6%**.
- Do not overlap spreader wheel tracks to avoid missed strips.
- Do not apply when foliage is moist or dry, and sprinkle thoroughly after application to wash particles off the leaves.
- Do not use this product to control deep-rooted perennials such as Bermuda grass, paspalum, dandelion and coarse fescue.
- Do not apply on shaded areas receiving sunlight less than half the day.
- Do not use this product on all grass or dichondra-grass rated lawns.
- Do not apply sooner than 1 month after sodding or 6 months after seeding dichondra.
- Do not plant dichondra seed sooner than 6 months after using this product.
