Advantages of Turf Builder plus 2(R)

LEFT COLUMN

SUPERIOR QUALITY

SMALL LIGHTWEIGHT GRANULES MEAN BETTER WEED CONTROL. Most lawn weed controls must be absorbed through the weed's leaves to be effective. Turf Builder plus 2(R) granules are small and lightweight so they will stay on even the smallest weed leaves. And each Turf Builder plus 2(R) granule contains weed control and America's favorite lawn fertilizer. ✓

SCOTTS TRIONIZED(R) II FORMULA PROVIDES A MORE EFFICIENT NITROGEN. This means Turf Builder plus 2(R) now gives quick, deep greening while feeding your lawn as it needs to be fed. ✓

TURF BUILDER PLUS 2(R) PROVIDES UP TO TWO MONTHS OF GREENING. The nitrogen in Turf Builder plus 2(R) is time-released to help keep a supply of this essential nutrient available to your lawn. This means that your lawn will stay thick and green for up to two months. ✓

EACH TURF BUILDER PLUS 2(R) GRANULE CONTAINS NPK AND WEED CONTROL. We bond Scotts unique controlled-release nitrogen(N) with phosphorous(P) and potassium(K) and a weed control, so your lawn receives a safe even feeding, and effective weed control. ✓

Easy To Apply

LEFT COLUMN

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

APPLICATION

- . Apply anytime weeds are actively growing (when daytime temperatures are consistently above 60°).
- . Apply on a calm day.
- . Apply to moist grass. To help particles stick to weed leaves the grass should be thoroughly watered or wet from dew before applying Turf Builder plus 2(R).
- . Do not use this product on flowers, shrubs, fruit or vegetable plants or on creeping bentgrass, St. Augustine and dichondra lawns. On bermudagrass lawns, under certain conditions, some temporary discoloration may result.

WATERING OR RAIN

Do not water your lawn for 24 hours after application. Water will wash the weed control off the weed's leaves and reduce the effectiveness of this product.

This product should not be applied if rain is expected within the next 24 hours.

SPREADER

Be careful when applying this product near shrubs, flower beds or vegetable gardens as contact with weed control may damage these desirable plants. The Scotts PF Drop Spreaders provide excellent controlled application to protect these areas. When using the EasyGreen™ Rotary Spreader take special care near desirable plants.

RIGHT COLUMN

IMPORTANT

WHAT TO EXPECT

Weed stems and leaves will begin to twist and curl in a few days, but a month or more may be required for complete control.

This product will not prevent weed seeds from producing new plants.

BACK CONTINUED:

XXXXX

EXTREME TEMPERATURES

Avoid applying when temperatures are consistently above 90 degrees.

SEEDING/SODDING

Wait until the new grass has been mowed at least four times before applying Turf Builder plus 2(R) weed control.

If you are planning to seed, you should wait at least one month after you have applied Turf Builder plus 2(R).

TIPS ON SPREADING WITH SCOTTS SPREADERS

PF Drop:

- First apply 2 header strips
- Operate spreader the longest way of the lawn
- Overlap wheels to insure uniform feeding
- Shut off spreader when you have reached the header strips or stopped
- Mow lawn first if grass is tall enough to touch the bottom of spreader

EasyGreen™ Rotary:

- Slide shut-off lever to the right. Application automatically starts and stops when you do
- Avoid misses by making each pass about 30 inches from the previous one so some overlapping occurs
