TURF BUILDER
Plus 2(R)
BRAND

weed control Plus lawn fertilizer
for use on bahia, bermuda, bluegrass, centipede,
fescue, ryegrass or zoysia lawns

(ILLUS.)

Treated

Untreated

Clears out dandelions
and over 50 other broadleaf weeds

Plus fertilizes
with a feeding of Turf Builder(R)

for developing thick, green lawns

Do Not use on St. Augustine, Carpetgrass, Dichondra, or Lippia

LAWN PRO_R

Available only at authorized
Scotts_R Lawn Pro_R dealers

Eliminates dandelions and more than 50 other broadleaf weeds after they sprout
and helps make your lawn its thickest, greenest ever.

XX% more greening power than Brand X (Turf Builder Plus 2).

Eliminates dandelions, clover, chickweed and other non-grassy weeds while
greening your lawn without rapid, extreme growth.

Small, lightweight granules provide complete uniform coverage and are quickly
absorbed to help insure control of large and small weeds.

Weeds are killed completely -- roots and all.

Formulated for the home environment.

ACCEPTED
OCT 20 1989
for the Federal Insecticide
Fungicide, and Rodenticide Act,
as amended, for the pesticide

weed control Plus lawn fertilizer

Advantages of Turf Builder Plus 2(R)

LEFT COLUMN

SUPERIOR QUALITY

SMALL LIGHTWEIGHT GRANULES MEAN BETTER WEED CONTROL. Most lawn weed controls must be absorbed through the weed's leaves to be effective. Turf Builder Plus 2(R) granules are small and lightweight so they will stay on even the smallest weed leaves. And each Turf Builder Plus 2 granule contains weed control and America's favorite lawn fertilizer.

SCOTTS TRIONIZED R II FORMULA PROVIDES A MORE EFFICIENT NITROGEN THAN EVER BEFORE to help promote quicker greening.

THE NITROGEN IN TURF BUILDER PLUS 2(R) IS TIME-RELEASED to provide a supply of this essential nutrient to help your lawn stay thick and green for up to 6 to 8 weeks.

EACH TURF BUILDER PLUS 2 R GRANULE CONTAINS NPK AND WEED CONTROL. We bond Scotts unique controlled-release nitrogen (N) with phosphorous (P) and potassium (K) and a weed control, so your lawn receives a safe even feeding, and effective weed control.

 Fertilizer

(Optional Back Panel Claims)

Eliminates dandelions and more than 50 other broadleaf weeds after they sprout and helps make your lawn its thickest, greenest ever.

What to expect: Dandelions and other weeds will be eliminated in 3 to 4 weeks and your lawn will be greener in 4 to 6 days.

Weed control in Turf Builder Plus 2 is absorbed by weed leaves killing the plant completely -- root and all.

Super Turf Builder_R lawn fertilizer contains extra nitrogen, carefully blended with potassium and phosphorus, to make your lawn greener.

- o Your lawn will be greener in 4 to 6 days if weather conditions are good (warm soil, some moisture) and application instructions were followed.
- o The greening will reach its peak 8 to 10 days after application. The color difference will be more noticeable if your lawn is hungry to begin with.
- o Super Turf Builder works below the soil, too, helping to promote root and rhizome development; this strengthens the grass plants and enables them to produce more blades of grass, and it thickens the lawn with the addition of new grass plants.
- o Thin areas of turf will fill in over time (about 6 weeks), creating a more uniformly dense lawn.

(Optional Info on Lawn Sizing/Application Seasons)

Coverage Treats (and fertilizes) X,XXX sq ft

How much is enough?

To determine the square footage of your lawn, walk the length and width of your lawn; one average pace equals about 3 feet. Multiply the length of the lawn by the width of the lawn. This equals the area of your lawn in square feet. NOTE: If your lawn has an irregular shape, measure square areas, then add the figures together to reach your total lawn size.

How and when to apply Apply in late spring, summer, or fall.

Easy To Apply

LEFT COLUMN

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

APPLICATION

- . Apply anytime weeds are actively growing (when daytime temperatures are consistently above 60°F). Avoid applying when temperatures are consistently above 90°F.
- . Apply on a calm day.
- . Apply to moist grass. To help particles stick to weed leaves the grass should be thoroughly watered or wet from dew before applying Turf Builder Plus 2(R).
- . On bahia and centipede lawns wait until after the second mowing of the year but NOT before mid-March. In the fall DO NOT treat centipede after the first of October and DO NOT treat bahia after the first of November.
- . Do not use this product on flowers, shrubs, fruit or vegetable plants or on creeping bentgrass, St. Augustine, dichondra or lippia lawns. On bermudagrass, bahia, centipede and zoysiagrass lawns, under certain conditions, some temporary discoloration may result.

WATERING OR RAIN

Do not water your lawn for 24 hours after application. Water will wash the weed control off the weed's leaves and reduce the effectiveness of this product.

This product should not be applied if rain is expected within the next 24 hours.

IMPORTANT

WHAT TO EXPECT

Weed stems and leaves will begin to twist and curl in a few days, but a month or more may be required for complete control.

This product will not prevent weed seeds from producing new plants.

EXTREME TEMPERATURES

Avoid applying when temperatures are consistently above 90 degrees.

9/27/11

BACK CONTINUED:

SEEDING/SODDING/SPRIGGING

Wait until the new grass has been mowed at least four times before applying Turf Builder Plus 2.

If you are planning to seed, sod or sprig, you should wait at least one month after you have applied Turf Builder Plus 2.

SPREADER (or Spreading Tips For best results, use a Scotts Spreader (chart))

Be careful when applying this product near shrubs, flower beds or vegetable gardens as contact with weed control may damage these desirable plants. The Scotts PF Drop Spreaders provide excellent controlled application to protect these areas. When using the EasyGreen™ or SpeedyGreen™ Rotary Spreader take special care near desirable plants.

(Non-Scotts spreader settings are approximate. You may need to adjust for proper coverage.)

TIPS ON SPREADING WITH SCOTTS SPREADERS

Scotts Drop:

- First apply 2 header strips
- Operate spreader the longest way of the lawn (ILLUS.)
- Overlap wheels to insure uniform feeding
- Shut off spreader when you have reached the header strips or stopped (ILLUS.)
- Mow lawn first if grass is tall enough to touch the bottom of spreader

EasyGreen™ Rotary:

- Slide shut-off lever to the right. Application automatically starts and stops when you do
- For complete coverage make each pass about 30 inches from the previous one so some overlapping occurs

SpeedyGreen™ Rotary:

- Shut-off spreader anytime you stop.
- For complete coverage make each pass about 5 feet from the previous one so some overlapping occurs.
- Avoid applying product in flower beds adjacent to lawns

(Optional Spreader Instructions)

Scotts Drop: Mow lawn first if grass is tall enough to touch the bottom of the spreader. First apply two header strips. Then operate spreader the longest way of the lawn. Overlap wheel marks to insure uniform feeding. Shut off spreader when you have reached the header strips or stopped.

(ILLUS)

Scotts EasyGreen™ Rotary: Slide shut-off lever to the right; application automatically starts and stops when you do. For complete coverage make each pass about 30 inches for the previous one so some overlapping occurs.

(ILLUS.)

Scotts SpeedyGreen™ Rotary: Shut off spreader anytime your stop. For complete coverage make each pass about 5 feet from the previous one, so some overlapping occurs. Avoid applying this product on flowers, vegetables and shrub plantings.
