LAWN INSECT CONTROL

A PROBLEM-SOLVING PRODUCT FOR SCOTT'S, THE LAWN PEOPLE

Controls these insects in lawns

<u>ants</u>	<u>carwigs</u>	<u>mosquitoes</u>
<u>armyworms</u>	<u>fleas</u>	<u>sod webworms</u>
<u>cutworms</u>	<u>leafhoppers</u>	<u>tropical sod webworms</u>
<u>crickets</u>	<u>millipedes</u>	<u>vegetable weevils</u>

When to use

Use whenever chewed or brown grass or dichondra indicates insect activity, or whenever insects are a nuisance.

Apply when rain isn't expected for at least 24 hours. Avoid watering, mowing, or walking on area for 24 hours after application.

How to apply

Use a Scott's Sprinkler (Standard or Automatic) at these settings to apply evenly:

NORMAL RATE—treat 5,000 sq ft . . . . . 1/2 cup

HEAVY INFESTATION—treat 5,000 sq ft . . . . . 3/4 cup

For more information, see the label on the bag.

Insect activity will be reduced within 24 hours. For best results, reapply every 2 weeks.

For more information, see the label on the bag. For more information, see the label on the bag.

For more information, see the label on the bag. For more information, see the label on the bag.
