and webworms (saw moth larvae)		vegetable weevils	

A PROBLEM-SOLVING PRODUCT BY SCOTTS, THE LAWN PEOPLE.

### How To Use

<p>DO apply when insect activity or damage (chewed or browned leaves) is first observed on the lawn.</p> <p>For grubs, the most likely period is from late July through early October; the next most likely period is Spring.</p> <p>For mole crickets, the best time to apply is on May or June.</p> <p>DO apply when lawn is dry.</p> <p>DO water lawn after application to wash granules from the lawn foliage. If treating for grubs, water thoroughly so that active ingredients will be carried into the soil zone(s).</p> <p>DO make a repeat application of Scotts Lawn Insect Control (with or without fertilizer) if there are signs of renewed insect activity. (Normally, application gives effective control for approximately 6 weeks.)</p>	<p>DO apply with Scotts Spreader (Standard or Automatic Models) setting <b>6%</b>.</p> <p>DO NOT treat just the browned areas of lawn. To prevent further damage, treat entire lawn.</p> <p>DO NOT use any other lawn control products for at least one week after application.</p> <p>DO NOT allow traffic on lawn after application until granules are washed off lawn foliage and lawn has dried.</p> <p>DO NOT use on fruit or vegetable plantings.</p> <p>DO NOT apply with a rotary-type spreader.</p>
