How:

- Lightly water soil and eliminate existing weeds.
- Fertilize the soil (see back).
- Apply this product uniformly.
- Do not rake in.
- Water lightly after application.

How Much:

- On sandy soils (all listed crops except strawberries): 1 cup (0.25) per 65 sq. ft. Scotts spreader setting 1/2.
- On heavy soils (all listed crops except strawberries): 1 cup (0.25) per 65 sq. ft. Scotts spreader setting 1/2.
- On any soil (strawberries only): 1 cup (0.25) per 65 sq. ft. Scotts spreader setting 1/2.

Application Rate (Actual-Size)

Sprinkle evenly as shown.

Sandy Soils

Heavy Soils

Replanting Notes:

- All crops listed above may be planted following harvest of a treated crop.
- Replanting crops other than those listed above in treated soil within 8 inches of application may result in crop injury.
- Replanting is advised for use in early crop failure due to stunting and tips may result in crop injury.

Precautions:

- Wash hands before eating.
- Do not use on beets, white top beets, Tennessee greenpod, flat beans and other crops not listed on this label.
- This is not for pre-established weeds.
- Disturbing soil after application reduces effectiveness.
