Bonus for dichondra

Weed control plus fertilizer for dichondra

HOW TO USE

To control these actively growing weeds, apply any time and repeat in 8 weeks:

- | | | |
|--------------|----------|-----------------|
| oxalis | filaree | soloiva |
| white clover | cudweed | poa annua |
| chickweeds | pearwort | annual plantain |

To prevent spotted spurge, apply in December, January or early February and repeat in 8 weeks.

To prevent crabgrass, apply in December, January, February or March and repeat in 8 weeks.

To ensure proper distribution use a Scott Spreader at setting -7

Slightly overlap spreader wheel tracks to provide complete coverage.

PRECAUTIONS

Completely rinse particles off leaves immediately after application by adequate irrigation or hand hose spray.

Do not use on grass lawns.

On newly seeded areas wait 6 months before treating, on newly sodded or plugged areas wait one month. After application, wait 6 months before re-seeding.

Do not use on shaded areas receiving less than half a day of sunlight.

This product does not control deep-rooted perennials such as bermuda-grass, paspalums, dandelions and coarse fescue.
