**TURF BUILDER. PLUS**

# Moss Control

moss control plus lawn fertilizer

For use on turfgrasses including bluegrass, bentgrass, tall fescue and fine fescue.

**Controls Moss  
Provides a complete feeding  
of Scotts Turf Builder**

A problem-solving product from Scotts, the lawn people

**How To Use**

- |  |  |
|--|--|
| <b>DO</b> apply during winter or spring months when moss is actively growing.                    | <b>DONT</b> use this product on dichondra.   |
| <b>DO</b> apply when lawn is WET from dew, rain or watering.                                     | <b>DONT</b> use on a newly seeded or sodded lawn. Wait until it has been mowed at least four times.  |
| <b>DO</b> mow before application for best results. The mowing will expose low-growing moss.      | <b>DONT</b> seed for at least two growing months after treating with Turf Builder plus Moss Control.   |
| <b>DO</b> rake moss infested area prior to each application for best results.                    | <b>DONT</b> apply material to cement or stone. Sweep particles off walks and drives; then flush with water to avoid possibility of staining. |
| <b>DO</b> repeat application in one month if an extremely heavy moss infestation is encountered. | <b>DONT</b> apply additional fertilizer or a product containing fertilizer right after using this product. Wait at least one month.          |
| <b>DO</b> apply on a calm day.   | <b>DONT</b> apply another control product right after application. Wait at least one week.   |
| <b>DO</b> apply at Scotts Spreader (Standard or Automatic Model) setting (Treats 2,000 sq ft)    | <b>DONT</b> apply with rotary-type spreader.   |
| <b>DO</b> slightly overlap spreader's wheel track or you may have "stripes" of untreated lawn.   |  |

**What to expect**

Discoloration and blackening of moss will occur within a few days. Two to four weeks are required for full results. A temporary darkened appearance of the lawn of up to two weeks may result after applying this product.

If the lawn remains thin, a reinfestation of moss is more likely to occur. To maintain a good barrier against moss, regular fertilization (Turf Builder) and selective pruning of tree branches are recommended to promote the growth of dense turf. Seeding to improve density may also be required.

**Free bulletin-service**

As a user of this Scotts lawn product you are entitled to a free subscription to Lawn Care, our service bulletin which has been helping lawnowners for over 40 years.

Unless you already receive Lawn Care and this coupon and we'll mail you the seasonal issues prepared especially for your region of the country.

**What to expect**

Discoloration and blackening of moss will occur within a few days. Two to four weeks are required for full results. A temporary "skened" appearance of the lawn of up to two weeks may result after applying this product.

If the lawn remains thin, a reinfestation of moss is more likely to occur. To maintain a good barrier against moss, regular fertilization (Super Turf Builder) and selective pruning of tree branches are recommended to promote the growth of dense turf. Seeding to improve density may also be required.
