fertilizer with weedgrass preventer

high density

26-0-12 fertilizer with weedgrass preventer

fertilizer with weedgrass preventer

- prevents annual grassy weeds
- provides controlled release nitrogen feeding

Net Weight 38 1/16 lbs (17.26 kg)

KEEP OUT OF REACH OF CHILDREN  
CAUTION  
PRECAUTIONARY STATEMENTS

**Hazard to Humans and Domestic Animals:** CAUTION, causes eye irritation. Do not get in eyes, on skin, or on clothing. In case of contact immediately wash eyes or skin with plenty of water. Get medical attention if irritation persists. Harmful if swallowed. Avoid inhalation. Do not contaminate feed or foodstuffs.

**Environmental Hazards:** Toxic to fish. Keep out of lakes, ponds or streams. Do not contaminate water by cleaning of equipment or disposal of wastes.

**ACTIVE INGREDIENT:**  
S100 Dossopryl phosphorodithiostate 6.63%  
ester of N (2-mercaptoethyl) benzoesulfonamide 93.37%  
**INERT INGREDIENTS**  
TOTAL 100.00%

EPA Reg No 538 137 EPA Est 538 OH 1 Product of USA  
Fertilizer with Weedgrass Preventer 26 0 12

**GUARANTEED ANALYSIS**  
Total nitrogen (N) 26%  
20% water soluble nitrogen  
6% water insoluble nitrogen  
Soluble potash (K<sub>2</sub>O) 12%  
Derived from urea, methylene ureas and potassium sulfate

U. S. Process Pat Nos. 3,231,363, 3,705,194 and 3,989,470

## 26-0-12 Fertilizer with Weedgrass Preventer

### DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling. Controls these weeds as they sprout while fertilizing the turf:

<u>Grassy weeds</u>	<u>Broadleaf weeds</u>
crabgrass	henbit
foxtail	lambquarters
goosegrass	pigweed
Poa annua	shepherdspurse

### FOR USE ON ESTABLISHED TURFGRASS, DICHOONDRA AND PUTTING GREENS

To prevent crabgrass: apply in the fall at the RECOMMENDED RATE or late winter/early spring at the LIGHT RATE.

To prevent other spring-sprouting weeds apply at the RECOMMENDED RATE in the winter or before the third or fourth mowing in the spring, before these weeds sprout.

To prevent fall sprouting Poa annua (annual bluegrass), henbit, shepherdspurse, apply at the RECOMMENDED RATE in mid to late summer before germination. Repeat yearly. (West of Cascades in Oregon and Washington apply annually in early spring and late summer).

Turf may be either moist or dry.

### PRECAUTIONS

Do not use on areas composed of 50% or more Poa annua. Only newly planted areas, wait until grass has been mowed at least twice and has made good coverage. On newly planted dichondra no waiting is necessary. After application, avoid any severe aerating or raking which might disturb the surface and break the chemical barrier. Delay any new grass planting for 4 "growing" months. Applications should not exceed twice yearly.

### STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal. STORAGE: Store in a clean, dry place. Reseal opened bags by folding top down and securing. PESTICIDE DISPOSAL: Pesticide or residue that cannot be used according to label instructions must be disposed of according to Federal, State or local procedures under the Resource Conservation and Recovery Act. CONTAINER DISPOSAL: Dispose of bags according to approved Federal, State or local procedures under the Resource Conservation and Recovery Act.
