Marysville, Ohio 43041

Subject: Revised Labeling and Confidential Statement of Formula
Summer Insect and Disease Control Plus Lawn Fertilizer
EPA Registration Number 538-140
Your Applications Dated March 23 and May 5, 1993

Dear Mr. Snyder:

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act as amended, is acceptable provided that you make the labeling changes indicated below before you release the product for shipment bearing the amended labeling:

1. Add directions for "If swallowed..." to the Statement of Practical Treatment. (You have included the statement "Harmful if swallowed" in the Hazards to Humans and Domestic Animals section.)
2. On page 5, in the section headed "Advantages," delete "Safe feeding." (Our objection is to the word "safe." We feel that the word can be misleading on labeling for any product containing toxic substances such as insecticides. You may wish to suggest alternate wording. The remainder of the claim, "...won't burn lawn when applied as directed," is acceptable.)

Submit five (5) copies of your final printed labeling before you release the product for shipment.

We will accept the revised Confidential Statement of Formula, dated May 4, 1993. Note, however, that the ranges of the certified upper and lower limits for the active ingredients are somewhat greater than what we would normally expect. We

would expect the upper and lower limits of chlorpyrifos to be 0.83% and 0.68% respectively, and the upper and lower limits of thiophanate-methyl to be 5.78% and 5.23% respectively. We have enclosed a copy of 40 CFR 158.175 for your guidance.

Sincerely yours,

DHE

Dennis H. Edwards, Jr.

PRECAUTIONARY STATEMENTS

Hazards to Humans and Domestic Animals: Harmful if swallowed. May be absorbed through skin. Avoid contact with eyes, skin, or clothing. Do not apply by hand. Wash thoroughly with soap and water after using. Wash contaminated clothing before re-use. Avoid contamination of feed or foodstuffs. As directed, water lawn after application and allow to dry before permitting children or pets on treated areas. Do not feed clippings from treated turf to livestock and poultry.

Statement of Practical Treatment

If in eyes: Flush with water for at least 15 minutes.

If on skin: Wash thoroughly with soap and water. Contact a physician if irritation persists.

Note to physician: Insecticide active ingredient is a cholinesterase inhibitor. Treat symptomatically. Atropine only by injection is antidotal.

Environmental Hazards: This pesticide is toxic to birds, fish, and aquatic invertebrates. Birds feeding in treated areas may be killed. Clean up spilled product to reduce exposure to wildlife. Do not apply directly to water, to areas where surface water is present, or to intertidal areas below the mean high water mark. Runoff may be hazardous to aquatic organisms in neighboring areas. Do not contaminate water when disposing of equipment washwater or rinsate. Do not apply where runoff is likely to occur. Apply this product only as specified on this label.

ACTIVE INGREDIENT:

Dimethyl 4,4'-o-phenylenebis-3-thioallophnate.....	5.50%
Chlorpyrifos, 0,0-Diethyl 0-(3,5,6-trichloro-2-pyridyl) phosphorothioate.....	0.75%
INERT INGREDIENTS:	93.75%
Total	100.00%

Lawn Pro® Summer Insect and Disease Control
plus Lawn Fertilizer

Advantages

- Three products in one -- provides disease control, insect control, and feeding
- Prevents and controls important summer lawn diseases -- dollar spot, Fusarium blight (*Fusarium spp.*), summer patch (*Magnaporthe poae*), and necrotic ring spot (*Leptosphaeria korrae*)
- Controls surface-feeding lawn insects and pests -- chinch bugs, sod webworms (lawn moth larvae), and flea beetles
- Safe feeding -- won't burn lawn when applied as directed
- Guaranteed -- Scotts No-Quibble Guarantee™

Directions for Use

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

- When to use:

For disease control

Apply when disease activity is first noted. Make a second application to counteract the effects of new disease activity.

For disease prevention

Apply monthly during late spring and early summer months. If turf damage is noted after applications have been started, treat two weeks after the previous application, then continue the monthly prevention program.

For insect control

Apply when insect activity is first noted. Make followup applications monthly until turf damage has stopped.

How to use:

Apply at the NORMAL rate. For best results, water thoroughly (1/2 to 1 inch) before application and again immediately after application. Maintain good watering practices (minimum of 1 inch per week) throughout the growing season. Disease development is enhanced if turf is allowed to come under drought stress.

Results to expect:

Control of damaging insects and active disease problems plus fertilization to aid in recovery of damaged turf. Damage to the grass from insects will stop within hours; control of insects may require a week, but no more than 2 weeks. If severe damage is noted before the first application, recovery of the turf may be slow or seeding may be required to fill in damaged areas.

SPREADER SETTINGS

	Scotts Drop Spreaders	Scotts EasyGreen® Rotary	Scotts SpeedyGreen® Rotary
NORMAL RATE (treats 2,500 sq. ft.)	6*	26-1/2*	5*

[*Note to EPA: Spreader settings are approximate and may change at actual production run. EPA will be notified of any change.]

TIPS ON SPREADING WITH SCOTTS SPREADERS

Scotts Drop:

- Mow lawn before application if grass is tall enough to touch the bottom of spreader.
- First apply 2 header strips.

- Operate spreader the longest direction of the lawn.
- Overlap wheel tracks to ensure uniform feeding.
- Shut off spreader when you have reached the header strips or stopped.

EasyGreen® Rotary:

- Slide shutoff lever to the right. Application automatically starts and stops when you do.
- Avoid misses by making each pass about 30 inches from the previous one, so some overlapping occurs.

SpeedyGreen® Rotary:

- Shut off spreader anytime you stop.
- Avoid misses by making each pass about 5 feet from the previous one, so some overlapping occurs.

Additional Spreader Settings (Non-Scotts spreader settings are approximate. You may need to adjust for proper coverage.)

Cyclone Rotary (Model B)	4
Central Drop (#205)	6-1/2
Sears Drop (#19810)	5
Ortho Drop (#5000)	6
Greenview Drop (#105)	3
Precision Drop (Red Devil)	9

Storage and disposal

STORAGE: Store in a clean, dry place. Reseal opened bag by folding top down and securing.

PESTICIDE DISPOSAL: Securely wrap original container in several layers of newspaper and discard in trash.

CONTAINER DISPOSAL: Do not reuse bag. Discard bag in trash.
