Directions for Use

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

- . apply at any time. Lawn can be either wet or dry.
- . apply in late winter - early spring, before the third or fourth mowing and before temperatures are regularly in the 80's. Water after treatment to move the product to the soil surface.
- . Scotts recommends the PF-1 Spreader, the most accurate spreader you can buy, to receive the maximum benefit from Turf Builder Plus Halts<sup>(R)</sup>. DO NOT USE A ROTARY SPREADER.

Tips on Spreading with the Scotts PF-1 Spreader

- . first apply 2 header strips
- . operate spreader the longest way of the lawn or at right angles to the sun
- . overlap wheels to insure uniform feeding
- . shut off spreader when you have reached the header strips or stopped
- . mow lawn first if grass is tall enough to touch bottom of spreader

Feeding to Prevent PF1, STANDARD or AUTOMATIC

Crabgrass (only) (Treats 5,000 sq ft)	<input checked="" type="checkbox"/>
Barnyardgrass, foxtail in addition to crabgrass (Treats 3,000 sq ft)	<input checked="" type="checkbox"/>

Important: Do not rake for 4 months with a heavy rake to avoid disturbing the crabgrass barrier on the soil surface. Rain, snow or freezing weather after application will not affect results.

Actively growing crabgrass.

This product does not control actively growing crabgrass and other wild grasses. Scotts Summer Crabgrass Control<sup>(R)</sup> is recommended for actively growing crabgrass.

Seeding. DO NOT SEED OR SOD FOR 4 GROWING MONTHS AFTER USING TURF BUILDER PLUS HALTS. The crabgrass barrier prevents grass seeds from sprouting. If you are seeding use Scotts Starter<sup>TM</sup> Fertilizer with Crabgrass Preventer.

for established lawns

Advantages of Turf Builder plus Halts (R)

SUPERIOR QUALITY

REGULAR FEEDINGS

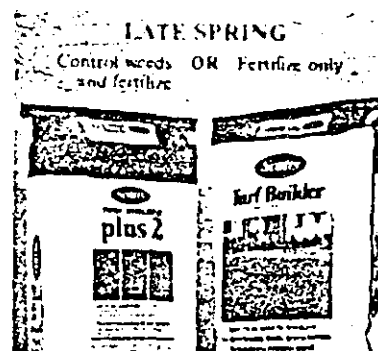

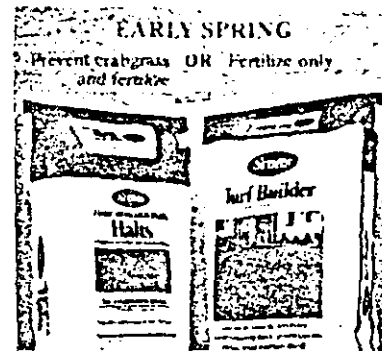

Prevents crabgrass while feeding your lawn. Establishes a barrier so that crabgrass can't sprout for up to four months, while giving your lawn a full feeding of Turf Builder (R) fertilizer.

Soil does not supply all the important nutrients your lawn needs. It must be fed on a regular basis if it is to thrive and maintain a healthy appearance. Underfed lawns thin out over time leaving openings for weeds, crabgrass and other problems.

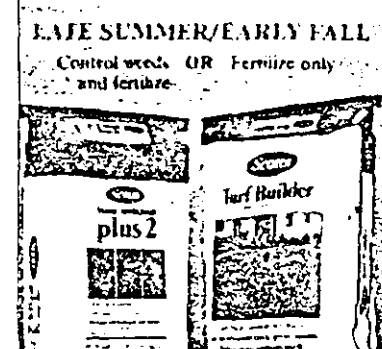

Turf Builder Plus Halts (R) won't burn your lawn. The exclusive Trionized (R) process buffers the nitrogen in Turf Builder Plus Halts (R). This means Turf Builder Plus Halts (R) will feed your lawn safely without the danger of burning.

For best results, therefore, Scotts recommends a program of regular feedings spaced throughout the year's growing season. If specific grassy or broadleaf weeds are a problem, the appropriate Turf Builder "Plus" products as indicated below, can be substituted to weed as you feed.

Turf Builder Plus Halts (R) provides up to 2 months of greening. The buffered nitrogen is time released to keep your lawn thick and green for up to 2 months.

Turf Builder based products provide a balanced feeding. Each particle of Turf Builder (R) is a complete fertilizer, containing nitrogen (N), phosphorus (P) and potassium (K). This means that the grass in your lawn will have a safe, balanced feeding and that with proper application, you will have uniform thickening and greening.

(ILLUS.)

(ILLUS.)

Turf Builder (R)

Every particle is a complete fertilizer.

Inefficient simple N-P-K mixture which may cause burning.
