crabgrass preventer plus lawn fertilizer

Advantages of Turf Builder plus Halts (R)

LEFT COLUMN

Superior Quality

Turf Builder plus Halts (R) - no one else has a tougher crabgrass preventer.  
And our small, uniform granules cover your lawn completely to stop crabgrass before it starts. All this means that Turf Builder plus Halts (R) gives your lawn the best crabgrass prevention available.

Scotts Trionized (R) II formula provides a more efficient nitrogen.  
This means Turf Builder plus Halts (R) now gives quick, deep greening while feeding your lawn as it needs to be fed.

Turf Builder plus Halts (R) won't burn your lawn. The nitrogen in the Trionized II formula is buffered. This means Turf Builder plus Halts (R) greens your lawn quickly without the danger of burning.

Turf Builder plus Halts (R) provides two full months of greening.  
The nitrogen in Turf Builder plus Halts (R) is time-released to help keep a supply of this essential nutrient available to your lawn. This means that your lawn will stay thick and green for two full months.

Each Turf Builder plus Halts (R) granule contains NPK and crabgrass preventer.  
We bond Scotts unique controlled-release nitrogen (N) with phosphorous (P) and potassium (K) and crabgrass preventer so your lawn receives a safe even feeding and the most effective crabgrass prevention available.

(ILLUS.)

(ILLUS.)

Scotts  
Turf Builder plus Halts (R)  
EVERY GRANULE CONTAINS NPK  
and Crabgrass Preventer.

Competitive  
Simple Mixture  
EACH GRANULE IS A  
SEPARATE CHEMICAL.

Provides safe, even greening  
with uniform crabgrass  
prevention.

May cause surge growth,  
burning, uneven greening  
and spotty crabgrass prevention.

Easy to Apply

Directions for Use

it is a violation of federal law to use this product in a manner inconsistent with its labeling.

Application

- . Apply in early Spring before the 3rd or 4th mowing or before temperatures are regularly in the 80's.
- . Turf Builder plus Halts(R) can be applied when your lawn is either wet or dry. It is not necessary to water immediately after application, however rainfall or irrigation is needed to activate the crabgrass prevention.
- . DO NOT SEED OR SOD FOR 4 MONTHS AFTER USING TURF BUILDER PLUS HALTS(R). The crabgrass barrier prevents grass seeds from sprouting.

Spreader

Please do not use this product on areas where you plan to seed. This product can prevent seeds from germinating.

The Scotts spreaders provide excellent controlled application to protect these areas.

Application Rate	Scotts Drop Spreaders	Scotts EasyGreen™ Rotary
Prevent crabgrass (Treats 5,000 sq ft)	XX	XX
Prevent barnyardgrass, foxtail and crabgrass. (Treats 3,000 sq ft)	XX	XX

RIGHT COLUMN

Important

Raking.

You may rake your lawn lightly to remove grass clippings or debris. But please avoid breaking the soil surface in your lawn for 4 months after application. Heavy raking will disturb the crabgrass barrier and reduce the effectiveness of this product.

Also, please do not apply to newly seeded or sodded areas until after the second mowing.

Actively growing crabgrass.

This product does not control actively growing crabgrass and other wild grasses.

TIPS ON SPREADING WITH SCOTTS SPREADERS.

PF Drop:

- . First apply 2 header strips .
- . Operate spreader the longest way of the lawn
- . Overlap wheels to insure uniform feeding
- . Shut off spreader when you have reached the header strips or stopped
- . Mow lawn first if grass is tall enough to touch the bottom of spreader

BACK CONTINUED:

EasyGreen™ Rotary:

- Slide shut-off lever to the right. Application automatically starts and stops when you do
- Avoid misses by making each pass about 30 inches from the previous one so some overlapping occurs
