SUPERIOR QUALITY

Prevents crabgrass while feeding your lawn

Establishes a barrier on the soil so that crabgrass can't sprout for up to four months, while giving your lawn a full feeding of Turf Builder<sub>R</sub> fertilizer.

(graphic demonstrating how Halts works)

Turf Builder Plus Halts provides up to 2 months of greening

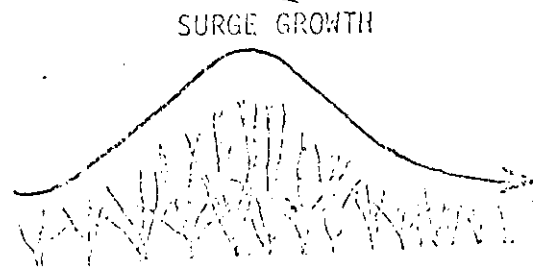

The nitrogen in Turf Builder Plus Halts is time-released to help your lawn grow thick and green for up to 2 months.

**BEST DOCUMENT AVAILABLE**

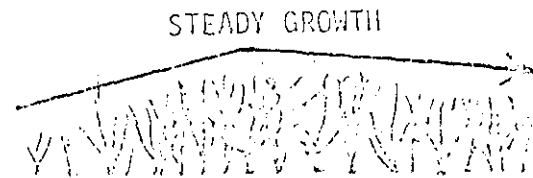

Turf Builder Plus Halts stimulates steady grass growth, unlike some fertilizers which can cause surge growth. When you mow grass that has grown too fast and too tall, you weaken the grass plant by "scalping." With Turf Builder Plus Halts you'll have less mowing and less chance of scalping when you mow.

5/8

typical fertilizer

Turf Builder Plus Halts

2 MONTH PERIOD

Turf Builder brand products provide a balanced feeding

Each particle of Turf Builder Plus Halts is a complete fertilizer containing nitrogen, phosphorus, and potassium. This means that each grass plant receives a balanced feeding and that with proper application, your lawn will be uniformly thick and green.

Turf Builder Plus Halts won't burn your lawn

Scotts exclusive Trionized process buffers the nitrogen in Turf Builder brand products. This means Turf Builder Plus Halts will feed your lawn safely without the danger of burning.

REGULAR FEEDINGS

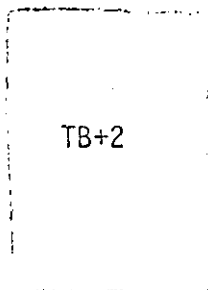

Soil does not supply all the important nutrients your lawn needs. It must be fed on a regular basis if it is to thrive and maintain a healthy appearance. Underfed lawns thin out over time leaving openings for weeds, crabgrass and other problems.

For best results, therefore, Scotts recommends a program of regular feeding spaced throughout the growing season.

PROBLEM SOLVERS

Scotts has a complete line of products to solve nearly every lawn problem. If you have weeds, Scotts Turf Builder Plus 2 will wipe them out while fertilizing your lawn. If you have insects\* or disease\* in your lawn, you can solve those problems while you fertilize to encourage the grass to fill-in the thin, damaged areas.

\*Products for these problems are available at your local Lawn Pro<sub>R</sub> dealer

TB+2

Turf Builder Plus 2 controls broadleaf weeds when they're actively growing while feeding your lawn with Turf Builder fertilizer.

If you have any questions or would like some advice about your lawn a staff of Scott specialists is waiting for your call at 1-800-543-TURF. telephone

EASY TO APPLY

Directions For Use

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

- Apply in late Winter or early Spring.
- Before March in Southern California
- Before mid-March in Northern California
- Before dandelions reach the puffball stage in all other areas

Lawn can be either wet or dry upon application. For dichondra lawns, sprinkle lightly after application to rinse particles off leaves.

Scotts recommends the PF-1 spreader, the most accurate spreader you can buy, to receive the maximum benefit from Turf Builder Plus Halts. DO NOT USE A ROTARY SPREADER.

SPREADER SETTING

(Treats 2,000 sq. ft.)

Use Scotts Halts (without fertilizer) to prevent barnyardgrass, foxtail, pigweed, lambsquarters, poa annua, henbit or shepherdspurse.

Allow at least a 4 month interval between applications of this product. But don't apply Turf Builder + Halts more often than twice yearly.

IMPORTANT

Do not rake or aerify for 4 months after application to avoid disturbing the crabgrass barrier on the soil surface. Rain, snow or freezing weather after application will not affect results.

Actively Growing Crabgrass

This product does not control actively growing crabgrass and other wild grasses. Scotts Summer Crabgrass Control is recommended to control actively growing crabgrass.

TIPS ON SPREADING WITH THE SCOTTS PF-1 SPREADER

- First apply 2 header strips
- It is easier to follow wheel tracks if you operate spreader the longest way of the lawn or at right angles to the sun.
- Overlap wheels about 2" to avoid striping.
- Shut off spreader when you reach the header strips or anytime you stop.
- If grass is tall enough to touch the bottom of the spreader, mow lawn before application.

SCOTT'S TURF BUILDER PLUS HALTS

Seeding/Sodding/Sprigging

Do not use on newly seeded or sodded areas until after the second mowing. No delay is necessary on dichondra. On newly sprigged areas, wait until the grass has filled in.

Do not plant for 4 growing months after application. The crabgrass barrier prevents grass seed from sprouting. ..

Special Offer: Thank you for using Turf Builder Plus Halts (R). To help insure your continued success with your lawn, we would like to offer you a free subscription to Lawn Care (R) magazine, which has been helping lawnowners for over 50 years.

Just send your name and address to Scotts, Marysville, Ohio 43041, and we'll mail you Lawn Care free for two years.

Scotts Policy  
No-Quibble Guarantee

If for any reason you are not satisfied with results after using this product, you are entitled to get your money back. Simply send us evidence of purchase and we will mail you a refund check promptly.
