Advantages of HALTS plus Turf Builder(R)

LEFT COLUMN

SUPERIOR QUALITY

Halts plus Turf Builder - no one else has a tougher crabgrass preventer. And our small, uniform granules cover your lawn completely to stop crabgrass before it starts. This means that Halts plus Turf Builder gives your lawn the most effective crabgrass prevention available.

Scotts new Trionized(R) II formula provides a more efficient nitrogen than ever before. This means Halts plus Turf Builder now promotes quick, deep greening while feeding your lawn as it needs to be fed.

Halts plus Turf Builder won't burn your lawn. The nitrogen in the Trionized(R) II formula is buffered. This means Halts plus Turf Builder greens your lawn quickly without the danger of burning.

Each Halts plus Turf Builder granule contains NPK and crabgrass preventer. We bond Scotts unique controlled-release nitrogen(N) with phosphorous(P), potassium(K) and crabgrass preventer so your lawn receives a safe, uniform feeding and the most effective crabgrass prevention available.

Halts plus Turf Builder provides up to two months of greening. The nitrogen in Halts plus Turf Builder is time-released to help keep a supply of this essential nutrient available to your lawn. This means that your lawn can stay thick and green for up to two months.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

Malts plus Turf Builder can be applied when your lawn is either wet or dry. For dichondra lawns, sprinkle lightly after application to rinse particles off leaves.

Apply to prevent germination of crabgrass, foxtail and barnyardgrass.

- . before March in southern California
- . before mid-March in northern California
- . in early spring (before dandelions reach the puffball stage) in all other areas

Rain, snow or freezing weather will not affect the performance of this product.

BACK CONTINUED:

DO NOT SEED OR SOD FOR 4 MONTHS AFTER USING HALTS PLUS TURF BUILDER. The crabgrass barrier prevents grass seed from sprouting.

- Scotts recommends the PF Spreader, the most accurate spreader you can buy, to receive the maximum benefit from Halts plus Turf Builder. DO NOT USE A ROTARY SPREADER, except Scotts EasyGreen™ rotary.

| Scotts Spreader Settings | PF Drop* | EasyGreen™ Rotary |
|---|----------|-------------------|
| Prevent crabgrass (Treats 5,000 sq ft) | 6 | 27 1/2 |
| Prevent barnyardgrass, foxtail in addition to crabgrass (Treats 3,000 sq ft) | 8 | 30 |

*also Automatic and Standard models

- allow at least a 4 month interval between applications of this product. Don't apply Halts plus Turf Builder more often than twice annually.

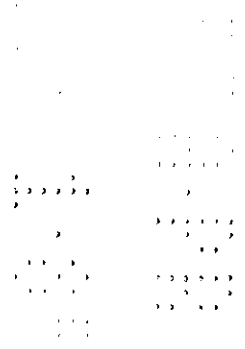

Important: Do not rake or aerify for 4 months after application to avoid disturbing the crabgrass barrier on the soil surface.

RIGHT COLUMN

Seeding/Sodding/Sprigging

Please do not apply to newly seeded or sodded areas until after the second mowing. No delay is necessary on dichondra. On newly sprigged areas, wait until the grass has filled in.

Actively growing crabgrass. This product does not control actively growing crabgrass and other existing grasses. Scotts Summer Crabgrass Control is recommended to control actively growing crabgrass.

BACK CONTINUED:

TIPS ON SPREADING WITH SCOTT'S SPREADERS

PF Drop:

- First apply 2 header strips
- It is easier to follow wheel tracks if you operate spreader the longest way of the lawn or at right angles to the sun (ILLUS.)
- Overlap wheels about 2" to avoid striping
- Shut off spreader when you reach the header strips or anytime you stop (ILLUS.)
- If grass is tall enough to touch the bottom of the spreader, mow lawn before application

EasyGreen™ Rotary:

- Slide shut-off lever to the right. Application automatically starts and stops when you do
- Avoid misses by making each pass about 30 inches from the previous one so some overlapping occurs
