Scott's Best Annual Program

Now it's easy for you to have a better lawn

Save money

Why even consider a lawn care service? Scott's Annual Program will give you a beautiful lawn for about one-third the cost.

Simple and easy

No more guesswork! You simply apply the right product one Step at a time.

Start anytime

You can start into the Annual Program anytime of the year. Just check the month and select the appropriate Step listed below.

Guaranteed results

Each Step is designed to the specific season to help give you a greener lawn.

step 1

Early Spring
February-April

Crabgrass Preventer plus Fertilizer—prevents crabgrass, foxtail, spurge, nutsedge and other annual weeds while providing deep, thick greening for up to 2 months. This is Scott's best fertilizer plus crabgrass preventer in the Pacific Northwest. Step™ 1 is "Moss Control plus Lawn Fertilizer." For St. Augustine grass, Step™ 1 is "Super House 5".

step 2

Late Spring
April-June

Weed Control plus Fertilizer—controls dandelions, clover, chickweed and other broadleaf weeds while greening your lawn for up to 2 more months. This is Scott's best weed and feed. For St. Augustinegrass, Step™ 2 is "Super Turf Builder".

step 3

Summer
June-August

Insect Control plus Fertilizer—controls white grubs, chinch bugs, sod webworms and other lawn insects plus greens your lawn through the summer.

step 4

Fall
August-November

Lawn Fertilizer—specially formulated for the Fall—the best time to develop a stronger root system for a stronger, denser, darker lawn. Helps your lawn green up even quicker next Spring. This is Scott's best fall fertilizer.

step 2 DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

Application

- ☐ Apply when weeds are actively growing, but not before yellow dandelion blooms have appeared.
- ☐ Apply in moist or dry foliage, however, for best results, apply to moist foliage.
- ☐ Be careful when applying this product near shrubs, flower beds or vegetable gardens as weed control may damage these desirable plants.
- ☐ Do not over apply, especially under the drip zone of desirable shrubs and trees as some of the control ingredients are not absorbed.
- ☐ Do not use on Bermuda, St. Augustine, creeping bentgrass, Bahia, or centipedegrass lawns or on newly seeded and sodded lawns until after the fourth mowing. Do not plant grass for one month after using this product and don't apply when daytime temperatures are consistently 90 degrees or above.

- ☐ Allow at least 4 weeks between program applications.

Watering or Rain

- ☐ Do not water your lawn for 24 hours after application. Water will wash the weed control off the weed's leaves and reduce the effectiveness of this product.
- ☐ This product should not be applied if rain is expected within the next 24 hours.

Tips on Spreading

- ☐ Do not apply during windy days.

- ☐ First apply 2 header strips.
- ☐ Overlap spreader application area to avoid strips of untreated lawn.
- ☐ Shut off spreader when you reach the header strip or any time you stop.
- ☐ EasyGreen Rotary
- ☐ Slide shut off lever to the right; application automatically starts and stops when you do.
- ☐ Avoid misses by making each pass about 20 inches from the previous one so some overlapping occurs.
- ☐ SpeedyGreen Rotary
- ☐ Shut off spreader anytime you stop.
- ☐ Avoid misses by making each pass about 6 feet from the previous one so some overlapping occurs.
