Dear Mr. Snyder:

Subject: Revised Labeling
Super Plus 2 For Grass/Weed Control Plus Fertilizer
EPA Registration No. 538-175
Your Submission Dated October 1, 1992

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, is acceptable with the following provision:

Due to new EPA policy, part of the Environmental Hazards section has been changed. To comply, change the sentence "Do not apply to water or wetlands (swamps, bogs, marshes and potholes)" to read "Do not apply directly to water, to areas where surface water is present or to intertidal areas below the mean high water mark."

A stamped copy is enclosed for your records. Please submit five (5) final printed copies for the referenced label, incorporating the above change, before releasing the product for shipment.

Sincerely yours,

Joanne I. Miller

Weed Control plus Fertilizer 32-4-3

Late Spring (Apply between April and June)

Controls dandelion, clover, chickweed, and other broadleaf weeds while greening your lawn.
Do not use on dichondra, St. Augustinegrass or creeping bentgrass lawns.

DIRECTIONS FOR USE:

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

APPLICATION

- Apply when weeds are actively growing, but not before yellow dandelion blooms have appeared.
- Apply to moist or dry foliage, however, for best results, apply to moist foliage.
- Be careful when applying this product near shrubs, flower beds or vegetable gardens as weed control may damage these desirable plants.
- Do not over apply, especially under the drip zone of desirable shrubs and trees as some of the control ingredients are root absorbed.
- Don't use on Dichondra, St. Augustine, or creeping bentgrass lawns or on newly seeded and sodded lawns until after the fourth mowing. Don't plant grass for one month after using this product and don't apply when daytime temperatures are consistently 90 degrees or above.
- Allow at least 4-6 weeks between program applications.

WATERING OR RAIN

- Do not water your lawn for 24 hours after application. Water will wash the weed control off the weeds leaves and reduce the effectiveness of this product.
- This product should not be applied if rain is expected within the next 24 hours.

SPREADING TIPS

Scotts Drop:

- Do not apply on windy days
- First apply two header strips
- Overlap spreader application area to avoid strips of untreated lawn
- Shut off spreader when you have reached the header strips or any time you stop

Scotts EasyGreen® Rotary:

- Slide shut-off lever to the right, application automatically starts and stops when you do
- Avoid misses by making each pass about 30 inches from the previous one so some overlapping occurs

Scotts SpeedyGreen® Rotary:

- Shut off spreader anytime you stop
- Avoid misses by making each pass about 5 ft. from the previous one so some overlapping occurs.
