It is a violation of Federal law to use this product in a manner inconsistent with its labeling. This product applies 1.5 pounds of 2,4-D per acre per application. The maximum number of broadcast applications per treatment site is two per year.

**Application**

- Apply when weeds are actively growing, but not before yellow dandelion blooms have appeared.
- Apply to moist or dry foliage, however, for best results, apply to moist foliage.
- Be careful when applying this product near shrubs, flower beds or vegetable gardens as weed control may damage these desirable plants.
- Do not over apply, especially under the drip zone of desirable shrubs and trees as some of the control ingredients are root absorbed.
- Do not use on dichondra, St. Augustinegrass, creeping bentgrass, bahia, or centipedegrass lawns or on newly seeded and sodded lawns until after the fourth mowing. Don't plant grass for one month after using this product and don't apply when daytime temperatures are consistently 90° F or above.
- Allow at least 4-6 weeks between program applications.

**Watering or Rain**

- Do not water your lawn for 24 hours after application. Water will wash the weed control off the weed's leaves and reduce the effectiveness of this product.
