UNITED STATES ENVIRONMENTAL PROTECTION AGENCY
WASHINGTON, D.C. 20460

OFFICE OF
CHEMICAL SAFETY AND
POLLUTION PREVENTION

Ms. Jessica McLaughlin
The Scotts Company LLC
14111 Scotts lawn Road
Marysville, OH 43041

NOV 10 2010

Subject: Label Amendment: Incorporation of comments from Agency amendment letter dated April 10, 2009; revisions per PR Notice 2007-4 and PR Notice 2008-1; and changes to marketing claims
Product Name: Super Plus 2 ® For Grass
EPA Reg. No. 538-175
Application Dated August 4, 2010

Dear Ms. McLaughlin:

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended, is acceptable, provided you make the following label changes before you release the product for shipment.

- a. Revise the marketing claim, "Formulated for the home environment" to "Formulated for the home lawn" (see pg. 15 of 22 under 'General Claims').
- b. Remove "safe" and add "your lawn" to the fertilizer advertisement claim on page 16 so that it reads as follows:
"Each lawn fertilizer particle provides gradual release that won't burn *your lawn* or cause surge growth when applied as directed."
- c. The following statement should accompany the Scott's recommended annual feeding/lawn care program marketing claims:
"If using multiple products throughout the year as part of an annual lawn care program, assure that maximum annual use rates for active ingredients are not exceeded as some products may contain the same active ingredient."

Continued on Page 2

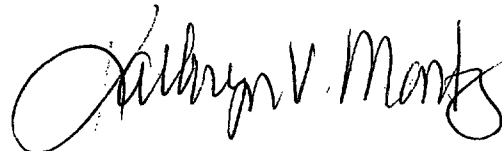

Page 2
EPA Reg. No 538-175
Label Amendment

Should you wish to add/retain a reference to the company's website on your label, then please be aware that the website becomes labeling under the Federal Insecticide Fungicide and Rodenticide Act and is subject to review by the Agency. If the website is false or misleading, the product would be misbranded and unlawful to sell or distribute under FIFRA section 12(a)(1)(E). 40 CFR 156.10(a)(5) list examples of statements EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product's label, claims made on the website may not substantially differ from those claims approved through the registration process. Therefore, should the Agency find or if it is brought to our attention that a website contains false or misleading statements or claims substantially differing from the EPA approved registration, the website will be referred to the EPA's Office of Enforcement and Compliance.

While no additional data is being requested at this time, marketing claims made on the pesticide label must be substantiated by data maintained in your files. If data supporting marketing claims made on the product label is not available then those claims must be removed.

A stamped copy of your label is enclosed for your records. You must submit one (1) copy of the final printed label before you release the product for shipment. Products shipped after the next printing must bear the new revised label. If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions. Amended labeling will supercede all previously accepted ones.

Sincerely,

Kathryn V. Montague
Product Manager 23
Herbicide Branch
Registration Division (7505P)

[FIRST AID AND ENVIRONMENTAL INFORMATION/HAZARDS]

[KEEP OUT OF REACH OF CHILDREN]
[CAUTION]

PRECAUTIONARY STATEMENTS

Hazards to Humans and Domestic Animals [ICON]

Caution: Harmful if absorbed through skin. Harmful if inhaled. Causes moderate eye irritation. Avoid contact with skin, eyes or clothing. Avoid breathing dust. Wear long-sleeved shirt, long pants, shoes, socks and chemical-resistant gloves made of any waterproof material.

FIRST AID [ICON]

If on skin or clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes.

If inhaled: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible.

If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.

Call a poison control center or doctor for treatment advice. Have the product container or label with you when calling a poison control center or doctor, or going for treatment. Emergency Medical Information: 1-800-543-TURF (8873).

Environmental Hazards [ICON]

This pesticide is toxic to fish and aquatic invertebrates and may adversely affect non-target plants. Drift and runoff may be hazardous to aquatic organisms in water adjacent to treated areas. To protect the environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, gutters or surface waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash pesticide off the treatment area. Sweeping any product that lands on a driveway, sidewalk, or street, back onto the treated area of the lawn or garden will help to prevent run off to water bodies or drainage systems.

This chemical has properties and characteristics associated with chemicals detected in groundwater. The use of this chemical in areas where soils are permeable, particularly where the water table is shallow, may result in groundwater contamination. Application around a cistern or well may result in contamination of drinking water or groundwater.

STORAGE AND DISPOSAL [ICON]

PESTICIDE STORAGE: Store in a cool, dry place. Reseal opened bag [by folding top down and securing].

PESTICIDE AND CONTAINER DISPOSAL: Nonrefillable container. Do not reuse or refill this container. **If empty:** Place in trash or offer for recycling if available. **If partly filled:** Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

EPA Reg. No. 538-175

- [Key Product Facts]**
- [How and When to Apply]**
- [Application [Information]]**

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

OPTION 1

This product applies 1.5 pounds of 2,4-D per acre per application. The maximum number of broadcast applications per treatment site is two per year. A minimum of 30 days between applications is required.

Restrictions

- Do not apply this product in a way that will contact any person or pet, either directly or through drift. Keep people and pets out of the area during application. Do not allow people or pets to enter the treated area until dusts have settled.
- Do not apply directly to or near water, storm drains, gutters, sewers, or drainage ditches. Do not apply within 25 feet of rivers, fish ponds, lakes, streams, reservoirs, marshes, estuaries, bays, and oceans. Do not apply when windy. Apply this product directly to your lawn or garden, and sweep any product landing on the driveway, sidewalk, gutter, or street, back onto the treated area. To prevent product runoff, do not over water the treated area[s] to the point of runoff or apply when raining or when rain is expected that day.
- Do not use this product on flowers, shrubs, fruit or vegetable plants or on St. Augustinegrass, Floratam, dichondra, lippia, carpetgrass or bentgrass [lawns].

Application

- Apply when weeds are actively growing (when daytime temperatures are consistently between 60°F and 90°F).
- Grass wet with dew or thoroughly watered grass helps particles stick to weed leaves.
- **In Spring** treat bahia and centipede lawns mid-March or later after the second mowing. **In Fall**, treat centipede lawns before October 1 and bahia lawns before November 1.

Watering or Rain

This product may be applied if rain is not expected in the next 24 hours.

Water your lawn no sooner than 24 hours after application. If watering sooner, water will wash the weed control off the weed's leaves and reduce the effectiveness of this product.

IMPORTANT

What to expect

Weed stems and leaves will begin to twist and curl in a few days, but a month or more may be required for control.

This product will not prevent weed seeds from producing new plants.

Under certain conditions, temporary discoloration may occur on bahia, centipede, bermudagrass, and zoysiagrass lawns.

Seeding/Sodding/Sprigging

Wait at least one month after you have applied this product before seeding, sodding or sprigging.

Mow new grass at least 4 times before applying.

END OF OPTION 1

OPTION 2

Note to PM:

EPA Reg. No. 538-175

Bold, italicized text is information for the reader and is not part of the label.
[Bracketed information is optional.] Text separated by / denotes and/or options.

- This product applies 1.5 pounds of 2,4-D per acre per application.
- Do not apply more than twice per year.
- A minimum of 30 days between applications is required.

Application

- Apply on a calm day.
- Make sure that the grass is wet from dew or sprinkling before applying. (This helps particles adhere to weed leaves to produce best results.)
- Set spreader to the setting indicated by the chart below [before applying].

Restrictions

- Do not apply this product in a way that will contact any person or pet, either directly or through drift. Keep people and pets out of the area during application. Do not allow people or pets to enter the treated area until dusts have settled.
- Do not apply directly to or near water, storm drains, gutters, sewers, or drainage ditches. Do not apply within 25 feet of rivers, fish ponds, lakes, streams, reservoirs, marshes, estuaries, bays, and oceans. Do not apply when windy. Apply this product directly to your lawn or garden, and sweep any product landing on the driveway, sidewalk, gutter, or street, back onto the treated area. To prevent product runoff, do not over water the treated area[s] to the point of runoff or apply when raining or when rain is expected that day.
- Do not water or mow lawn for at least 24 hours after application. (Granules must remain on weed leaves for 24 hours to be effective.)
- Do not apply if rain is expected within 24 hours.
- Do not apply if day temperatures are regularly below 60° F or above 90° F.
- Apply only to grass. Do not allow granules or dust to drift onto flowers, shrubs, fruit or vegetables.
- Grass should not touch the bottom of a drop spreader. Tall grass should be mowed a day or two before application.
- Delay application on newly seeded, sodded or sprigged areas until new grass has been mowed four times.
- Do not seed, sod or plant grass sprigs until at least one month after using this product.
- Do not apply on St. Augustinegrass, Floratam, dichondra, lippia, carpetgrass or bentgrass [lawns].
- On bahia or centipede grass lawns, wait until after the second mowing of the year, but not before mid-March.
- In fall, **DO NOT** treat centipede grass after Oct. 1, nor bahiagrass after Nov. 1.

END OF OPTION 2

OPTION 3

- This product applies 1.5 pounds of 2,4-D per acre per application.
- Apply no more than twice per year.
- A minimum of 30 days between applications is required.

Application

- Make sure that the grass is wet from dew or watering before applying. (This helps particles adhere to weed leaves to produce best results.)
- Set spreader to the setting indicated by the chart before applying. Fill spreader over bare ground or hard surface.
- Apply one or two header strips, then apply in longest direction of lawn. Shut off spreader each time you reach the header strip, or stop.
- Sweep or blow stray particles from hard surfaces back onto lawn area. Clean spreader away from hard surfaces or storm drains.
- One month after using this product, it is okay to seed, sod or plant grass sprigs.
- Mow grass 4X before applying on newly seeded, sodded or sprigged areas.

Restrictions

Note to PM:

EPA Reg. No. 538-175

Bold, italicized text is information for the reader and is not part of the label.
[Bracketed information is optional.] Text separated by / denotes and/or options.

- Do not apply this product in a way that will contact any person or pet, either directly or through drift. Keep people and pets out of the area during application. Do not allow people or pets to enter the treated area until dusts have settled.
- Do not apply directly to or near water, storm drains, gutters, sewers, or drainage ditches. Do not apply within 25 feet of rivers, fish ponds, lakes, streams, reservoirs, marshes, estuaries, bays, and oceans. Do not apply when windy. Apply this product directly to your lawn or garden, and sweep any product landing on the driveway, sidewalk, gutter, or street, back onto the treated area. To prevent product run-off, do not over water the treated area[s] to the point of runoff or apply when raining or when rain is expected that day.
- Do not apply this product if rain is expected within 24 hours.
- Do not apply when day temperatures are regularly below 60° F or above 90° F.
- Do not mow or water lawn for at least 24 hours after application. (Granules must remain on weed leaves for 24 hours to be effective.)
- Do not allow granules or dust to drift onto flowers, shrubs, fruit or vegetables.
- Do not apply this product on St. Augustinegrass, Floratam, dichondra, lippia, carpetgrass or bentgrass [lawns].
- Do not apply before the second mowing of the year and before mid-March on bahia or centipede grass lawns.
- Do not treat centipede grass after Oct. 1 and bahiagrass after Nov. 1.
- Do not apply to hard surfaces like driveways or streets.

END OF OPTION 3

OPTION 4

This product applies 1.5 pounds of 2,4-D per acre per application. The maximum number of broadcast applications per treatment site is two per year. A minimum of 30 days between applications is required.

Application

- Apply when weeds are actively growing (when daytime temperatures are consistently above 60° F).
- Apply on a calm day.
- Apply to moist grass. To help particles stick to weed leaves, the grass should be thoroughly watered or wet from dew before applying this product.
- On bahia and centipede lawns, wait until after the second mowing of the year but NOT before mid-March. In the fall, DO NOT treat centipede after the first of October and DO NOT treat bahia after the first of November.
- Do not use this product on flowers, shrubs, fruit or vegetable plants or on St. Augustinegrass, Floratam, dichondra, lippia, carpetgrass or bentgrass [lawns]. On Bermudagrass, bahia, centipede grass, zoysia lawns, under certain conditions, some temporary discoloration may result.

Restrictions

Do not apply this product in a way that will contact any person or pet, either directly or through drift. Keep people and pets out of the area during application. Do not allow people or pets to enter the treated area until dusts have settled.

Do not apply directly to or near water, storm drains, gutters, sewers, or drainage ditches. Do not apply within 25 feet of rivers, fish ponds, lakes, streams, reservoirs, marshes, estuaries, bays, and oceans. Do not apply when windy. Apply this product directly to your lawn or garden, and sweep any product landing on the driveway, sidewalk, gutter, or street, back onto the treated area. To prevent product run-off, do not over water the treated area[s] to the point of runoff or apply when raining or when rain is expected that day.

Watering or Rain

- Do not water your lawn for 24 hours after application. Water will wash the weed control off the weed's leaves and reduce the effectiveness of this product.
- This product should not be applied if rain is expected within the next 24 hours.

Important

What to Expect

- Weed stems and leaves will begin to twist and curl in a few days, but a month or more may be required for control.

- Apply only to grass. Do not allow granules or dust to drift onto flowers, shrubs, fruit or vegetables.
- Grass should not touch the bottom of a drop spreader. Tall grass should be mowed a day or two before application.
- Delay application on newly seeded, sodded or sprigged areas until new grass has been mowed 4 times.
- Do not seed, sod or plant grass sprigs until at least one month after using this product.
- Do not apply on St. Augustinegrass, Floratam, dichondra, lippia, carpetgrass or bentgrass [lawns].
- On bahia or centipedegrass lawns, wait until after the second mowing of the year, but NOT before mid-March.
- In fall, **DO NOT** treat centipedegrass after Oct. 1, nor bahiagrass after Nov. 1.

Easy to Follow Instructions [Quick Start Guide]

[You're just X simple steps away from a beautiful Scotts lawn!]

Apply with a drop or rotary spreader. For best results, use a Scotts spreader.

[Step X] Make sure that the grass is wet from dew or sprinkling before applying.

- This helps particles adhere to weed leaves to produce best results.

[Step X] Set and fill spreader.

- Set spreader to the setting indicated by the chart below.

[Step X] Apply [product].

- Apply on a calm day.
- Do not water or mow lawn for at least 24 hours after application. Granules must remain on weed leaves for 24 hours to be effective.

Note to PM:

EPA Reg. No. 538-175

Bold, italicized text is information for the reader and is not part of the label.
[Bracketed information is optional.] Text separated by / denotes and/or options.

- Delay application if rain is expected within 24 hours.

[Step X] Clean-up.

- Return unused product to original container and store out of reach of children and pets.
- [Sweeping product from hard surfaces back onto the lawn keeps [product]/[valuable feeding nutrients] on the grass]

[Step 5] [Enjoy your lawn.]

END OF OPTION 5

One of the following claims will be listed on the FPL followed by any or all weeds listed below

- [Weeds controlled/killed [include/including]]
- [Controls/kills [the following] [these] [X (*insert number*) of] [common lawn] [weeds]]];
- [Controls/kills [broadleaf] weeds such as/including:]

EPA Reg. No. 538-175

OPTION 1

Scotts Drop:

- Do not apply during windy days.
- [First apply 2 header strips.]
- Overlap spreader application area to avoid strips of untreated lawn.
- [Shut off spreader when you reach the header strip or anytime you stop.]

EasyGreen® Rotary:

- Slide shut-off lever to the right, [application automatically starts and stops when you do]
- Avoid misses by making each pass about 30 inches from the previous one so some overlapping occurs.

- Builds thick, green turf from the roots up [without burning your lawn]
- Scotts Best Annual Program For A Picture-Perfect Lawn
- Boost of nutrients to help your lawn survive/prepare for the summer/summer stress/heat, drought & wear and tear!
- Develops longer, deeper roots to help your lawn survive/prepare for the summer/summer stress/heat, drought & wear and tear!
- Builds thick, green turf without burning
- Feeds lawn, helping turf to fill in where weeds once were
- Strengthens/protects your lawn
- Fast, long lasting greening power
- Won't burn lawns, guaranteed
- No burning
- No surge growth
- Builds thick, green lawns
- Quick greening, long lasting
- Patented, timed-released nitrogen formula builds thick, green lawns from the roots up
- Each lawn fertilizer particle provides safe gradual release that won't burn or cause surge growth when applied as directed
- Delivers nutrients which enhance root growth and provide extended feeding
- All the nutrients your lawn needs in one application/bag/step
- Scotts All-in-One®** particle combines essential nutrients into every particle (for even feeding)
- Total nutrients package helps repair thin and bare spots in your lawn
- Patented timed-release nitrogen formula builds thick, green lawns from the roots up
- Miracle-Gro® nutrients help develop a thicker, greener lawn
- **[ICON]** This lawn is starving and has weeds
- **[ICON]** This lawn was fed with Super Plus 2® for Grass
- **[ICON]** Treated
- **[ICON]** Untreated
- **[ICON]** Particle with N[P]K
- XX Nitrogen: Essential for plant growth; makes grass green
- X Phosphorus: Stimulates root growth; helps grass multiply
- X Potassium: Makes plant strong; better able to resist drought and extreme heat
- Super Plus 2® for Grass lawn fertilizer contains extra nitrogen, carefully blended with [phosphorus and] potassium, to make your lawn greener
 - Your lawn will be greener in 4 to 6 days if weather conditions are good (warm soil, some moisture) and application instructions were followed
 - The greening will reach its peak 8 to 10 days after application. The color difference will be more noticeable if your lawn is hungry to begin with
 - Super Plus 2® for Grass works below the soil, too, helping to promote root and rhizome development; this strengthens the grass plants and enables them to produce more blades of grass, and it thickens the lawn with the addition of new grass plants
 - This areas of turf will fill in over time (about 6 weeks), creating a more uniformly dense lawn
- Patented timed-release Miracle® Capsules feed your lawn over an extended period of time
- The result is a beautiful, thicker, greener lawn
- (Scotts®) Golf's Choice for Greener Turf
 - Golf Course superintendents have relied on Scotts products to grow fine turf since the beginning of the century. In fact, Scotts products are used by XX of the top XX golf courses in the United States – and now Ultra Turf Builder® products allow you to use that same high-performance technology on your home lawn. Go for the green with Scotts!
- (Scotts®) Baseball's Choice for Greener Fields
 - If you've ever marveled at the beauty of the grass on baseball's finest fields and wondered how you could possibly grow that kind of turf at home, you hold the answer in your hands. Scotts, the official turf care company of Major League Baseball, now offers Ultra Turf

EPA Reg. No. 538-175

Builder® products for homeowners, with the fertilizer technology used by professional groundskeepers for big-league ballparks.

Packaging Claims

- Easy-tear, replaceable pour spout
- Easy to Carry Package!
- New, easy pour spout!
- Easy open, resealable bag

How Much Is Enough?

To determine the square footage of your lawn, walk the length and width of your lawn; one average pace equals about 3 feet. Multiply the length of the lawn by the width of the lawn. This equals the area of your lawn in square feet. NOTE: If your lawn has an irregular shape, measure square areas, then add the figures together to reach your total lawn size.

SEASONAL PRODUCT APPLICATION PROGRAMS

[There's a Scotts® product for every need]

[Use any of these products to keep your lawn looking great all season]

[How often should I feed my lawn?]

[Just like your body needs nutrients to thrive, your lawn needs a regular supply of nutrients to stay thick and strong. So, for a thick, beautiful Scotts lawn that can stand up to heat, drought, wear and tear, we recommend feeding every 6-8 weeks.]

For best results, apply the Recommended Scotts® Turf Builder® Annual Program
No more guesswork... apply the right product at the right time for a thick, green lawn
Start anytime... just check the month below and apply products at 2 month intervals

EPA Reg. No. 538-175

Optional Winterizer Feeding

Late Fall

(Sept. – Nov.)

(4 to 6 weeks after Early Fall Turf Builder feeding)

Apply as a last feeding in fall to help prepare your lawn for winter

Super Winterizer

Additional Super Winterizer Feeding

Late Fall

September – November

4 to 6 weeks after Early Fall fertilizer feeding. Apply as last feeding in fall to help prepare your lawn for winter.

Now it's easy for you to have a better lawn

Save money

Why even consider a lawn care service? Scotts Annual Program will give you a beautiful lawn for less money.

Or

Why even consider a lawn care service? Scotts Lawn Pro® Annual Program will give you a beautiful lawn for about one-third the cost.

Simple and easy

No more guesswork. You simply apply the right product – one Step at a time.

Start anytime

You can begin the Annual Program anytime of the year. Just check the month and select the appropriate Step listed below.

Guaranteed results

Each Step is designed to the specific season to help give you a healthier, greener lawn.

Scotts tiny, lightweight granules provided two advantages:

1. They stick to weed leaves
2. They spread evenly for better weed control and feeding. The better the product adheres to the weed leaves, the better the results!

The Scotts Advantage®

Tiny, Lightweight Particles For Better Weed Control

Weed killers work by entering through the weeds' leaves. Therefore, it's best to apply this product to a wet lawn, so the particles can stick better to the weeds. Super Plus 2® for Grass has tiny, lightweight granules that stick to weed leaves for control of broadleaf weeds.

-OR-

The Scotts Advantage®

Each of Scotts exclusive All-in-One Particles®* contains the guaranteed feeding nutrients and the weed control ingredients to provide consistent feeding and weed control to every treated square inch of your lawn. The result: A thick, green lawn without burning. GUARANTEED.

*All-in-One Particles® = nitrogen, phosphorous, potassium and the weed control ingredient contained in [on] every particle.

-OR-

*All-in-One Particles® = nitrogen, potassium and the weed control ingredient contained in [on] every particle.

-OR-

The Scotts Advantage®

Each particle/granule is All Food plus Weed-Killing power and contains the guaranteed feeding nutrients and the weed control ingredients to provide consistent feeding and weed control to every treated square inch of your lawn. The result: A thick, green lawn without burning. GUARANTEED.

Advantages of Super Plus 2® for Grass

SMALL LIGHTWEIGHT GRANULES MEAN BETTER WEED CONTROL. Super Plus 2® for Grass granules are small and lightweight so they will stay on even the smallest weed leaves. And each Super Plus 2® for Grass granules contains weed control and lawn fertilizer.

SCOTTS TRIONIZED® II FORMULA PROVIDES A MORE EFFICIENT NITROGEN THAN EVER BEFORE to help promote quick greening.

THE NITROGEN IN SUPER PLUS 2® FOR GRASS IS TIMED-RELEASE to provide a supply of this essential nutrient to help your lawn stay thick and green for up to 6 to 8 weeks.

EACH SUPER PLUS 2® FOR GRASS GRANULE CONTAINS NPK [NK] AND WEED CONTROL. We bond Scotts® unique controlled-release nitrogen (N) [with phosphorus (p)] and potassium (K) and weed control, so your lawn receives a uniform feeding, and effective weed control.

[ICON] Scotts Super Plus 2® for Grass
EVERY GRANULE CONTAINS NPK [NK] AND WEED CONTROL
Provides uniform greening with effective weed control
Super Plus 2® for Grass particles deliver the same ratio of nitrogen, phosphorus, potassium and weed control to every treated square inch of turf for even, consistent feeding plus better weed control.

How Weed Control Works

Small, lightweight granules mean better weed control. The weed control in this product consists of granules that are small and lightweight, so they will stay on even the smallest weed leaves. The weed control in Super Plus 2® for Grass is absorbed by weed leaves (the weed's leaves), and kills the plant.

Other Great Turf Builder® Products for Your Lawn:

To prevent crabgrass, use Turf Builder® Plus Halts. This problem solver forms a protective layer to stop ugly crabgrass before it starts.

If you don't have weed problems, use Turf Builder®. Turf Builder promotes quick, deep greening without the danger of burning.

These great Turf Builder® products are developed specially by Scotts for the unique needs of your lawn – your satisfaction is unconditionally guaranteed.

For lawns in the shaded areas, phone 1-800-534-TURF or visit our website at www.scottslawn.com for the Annual Lawn Care Program for your area.

The shaded areas that would be referenced are in the southern US. This product is not recommended for use on warm season grasses as noted throughout the label. Consumers in these areas should contact Scotts for information on products in their areas.

Scotts & Your Environment >> [ICON: Scotts]

We care

Scotts products are designed with care to grow thicker, greener lawns.

[Because] A Green Lawn Is A Good Lawn

A healthy lawn can clean the air, produce oxygen and prevent runoff and soil erosion.

You can make a difference

Help keep our water resources clean. Apply this product only to your lawn, and sweep any product that lands in the driveway, sidewalk or street back on to your lawn.

TIPS FOR LAWCARE SUCCESS:

Feed regularly for your best lawn. Regular feedings of Scotts Turf Builder will help build a lawn you and your family can enjoy. Scotts Turf Builder provides the nutrients your lawn needs to look its best and withstand the stresses of weeds, heat, drought and family activity.
Mow your lawn high. Mowing high allows the grass to develop a deep root system & helps your lawn use water more effectively.
Leave the grass clippings on your lawn. This recycles the plant nutrients back into the soil.
Conserve water. Your lawn will begin to wilt when water is needed. As much as possible, take advantage of nature's sprinkler and rely on the rain to water your lawn.

Dedicated To A Beautiful World™

Trusted by generations of homeowners, Scotts is dedicated to helping enhance and protect the beauty of your home environment. [-Scotts]

[ICON: Water Smart] **Well-fed lawns are more efficient at using available water.** Feeding with [Scotts] fertilizer helps build a thick lawn with more roots to better absorb water and nutrients than unfed lawns. This helps protect your lawn against heat, drought and other stresses.
