Fertilizer plus Broadleaf Weed Control

ACCEPTED
SEP 17 1982
Under the Federal Insecticide,
Fungicide, and Rodenticide Act,
as amended, for the pesticide
registered under
EPA Reg. No. 538-180

weed control plus lawn fertilizer
For use on bluegrass, ryegrass or fescue lawns.

Advantages of Fertilizer plus Broadleaf Weed Control

SUPERIOR QUALITY

- **Controls weeds while feeding your lawn.** Wipes out dandelions and 13 other weeds while giving your lawn a full feeding of Turf Builder.
- **Turf Builder provides up to 2 months of greening.** The buffered nitrogen is time released to keep your lawn thick and green for up to two months.
- **Turf Builder based products provide a balanced feeding.** Each particle of Turf Builder is a complete fertilizer, containing nitrogen (N), phosphorus (P) and potassium (K). This means that the grass in your lawn will have a safe, balanced feeding and that with proper application, you will have uniform thickening and greening.

Turf Builder® Blend of separate particles of N,P,K. Every particle is a complete fertilizer.

WEEDS CONTROLLED

black medic	coast dandelion	ragweed
bull thistle	ground ivy	plantain
crabweed	red clover	prickly lettuce
cadweed	three-seeded	white clover
dandelion	mercury	yellow wood sorrel

REGULAR FEEDINGS

Soil does not supply all the important nutrients your lawn needs. Undernourished lawns thin out over time, leaving openings for weeds, crabgrass and other problems. Scotts recommends four applications of a Turf Builder® product each year to provide the nourishment needed by the millions of grass plants that are growing in a beautiful, thick green lawn. Turf Builder Plus 2 and Turf Builder Plus Halts, which they address specific weed problems, also provide a complete feeding of Turf Builder.

EASY TO APPLY

Directions for use

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

- apply when weeds are actively growing, but not before dandelions have turned yellow
- apply on a calm day, not windy
- apply to moist grass. For best results, the grass should be thoroughly watered or wet from dew before applying Fertilizer plus Broadleaf Weed Control.

IMPORTANT: AFTER YOU HAVE APPLIED FERTILIZER PLUS BROADLEAF WEED CONTROL, DO NOT WATER YOUR LAWN FOR 24 HOURS AND DON'T APPLY IF RAIN IS EXPECTED WITHIN 24 HOURS.

- Scotts recommends the PE-1 Spreader, the most accurate spreader you can buy, to receive the maximum benefit from Fertilizer plus Broadleaf Weed Control. DO NOT USE A ROTARY SPREADER.

Feeding Rate.

PE-1, Standard or Automatic

5 1/2

What to expect.

Weed stems and leaves will begin to wilt and curl in a few days, but a month or more may be required for complete control.

A few weeds may resist control. For yard these weed specimens to Scott, Marysville, Ohio 43041 and we will advise you further.

PLEASE NOTE

Desirable Plants

Do not use on flowers, shrubs, fruit or vegetable plants or on creeping bentgrass, clover, dichondra, St. Augustine, Bet. midgrass, centipede, bahia or carpetgrass lawns.

Extreme Temperatures.

Avoid applying when temperatures are consistently above 90 degrees.

Tips on Spreading with a Scotts PE-1 Spreader

- First apply 2 header strips
- operate spreader the longest way of the lawn or at right angles to the sun
- overlap wheels to insure uniform feeding
- shut off spreader when you have reached the header strips or stopped
- if grass would be tall enough to touch bottom of spreader mow lawn two days before application

Seeding Sodding

After application wait one month before seeding. If you have already seeded or sodded, wait one month or until the new grass has been mowed at least four times before applying.

SPECIAL OFFER: Thank you for using Fertilizer plus Broadleaf Weed Control. To help assure your continued success with your lawn, we would like to offer you a free subscription to Lawn Care magazine, which has been helping lawnowners for over 50 years.
