Directions for Use

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

Not for use on golf course putting greens. Fertilizes grass and controls these rosette and vining type weeds:

Aster Bittercress Black medic Bristly oxtongue Buckhorn Bull thistle Burclover Buttonweed Carpetweed Catsear (coast dandelion) Chickweed Chickory Cinquefoil Clover (white) Cudweed Curly dock Dandelion Dichondra

English daisy Eveningprimrose Filaree Fleabane Ground ivy Hawkweed Healall Henbit Horseweed Knotweed (seedling) Lambsquarter Lippia (matchweed) Mallow Moneywort Morningglory Mustard Pannywort Pepperweed

Pigweed Plantain Prickly lettuce Purslane Pusseytoes Ragweed Scarlet pimpernel Shadflower (whitlowort) Shepherdspurse Smartweed Sowthistle Stitchwort Threeseeded mercury Thymeleaf sandwort Vetch Yellow rocket Yellow toadflax

ľ.

For use on ornamental Turfgrass areas other than putting greens.

Apply to moist foliage at the RECOMMENDED RATE or for better distribution when using a rotary spreader, apply at the HALF RATE with a reduced width of coverage (see spreader settings). Apply when weeds are growing actively. Grass should not be so tall it touches the bottom of the spreader.

Rain, sprinkling, mowing, or heavy traffic within 24 hours after application can knock granules off weeds and may reduce effectiveness. Apply under non-windy conditions, thereby reducing drift to non-target areas, and optimizing particle distribution for good weed control. Retreating may be necessary, but wait at least 3 weeks to observe full results of first application.
