Advantages of Turf Builder plus Halts.

SUPERIOR QUALITY

TURF BUILDER PLUS HALTS™—NO ONE ELSE HAS A TOLCAMEL CRABGRASS, FOXTAIL AND SPURGE PREVENTER And our small, uniform granules cover your lawn completely to keep these weeds from ever starting. All this means that Turf Builder plus Halts gives you the best weed control crabgrass, foxtail and spurge preventer ever available.

SCOTT'S TECHNO-KEEP FORMULA PROVIDES A MORE EFFICIENT NITROGEN. This means Turf Builder plus Halts will give you quick, deep greening while feeding your lawn as it needs to be fed.

TURF BUILDER PLUS HALTS WON'T BURN YOUR LAWN. The nitrogen in the formula is buffered. This means Turf Builder plus Halts gives your lawn quick, without the danger of burning.

TURF BUILDER PLUS HALTS PROVIDES TWO FULL MONTHS OF GREENING. The nitrogen in Turf Builder plus Halts is long retained to help keep a supply of this essential nutrient available to your lawn. This means that your lawn will stay thick and green for one full month.

EACH TURF BUILDER PLUS HALTS GRANULE CONTAINS NITRAGEN AND CRABGRASS PREVENTER. We found Scotts unique controlled-release nitrogen for quick greening and maximum effect and a unique crabgrass preventer so your lawn receives a safe, even feeding and the most effective crabgrass, foxtail and spurge prevention available.

Easy to Apply

DIRECTIONS FOR USE

It is a trademark of Federal Law to use the product in a manner inconsistent with its labeling.

APPLICATION

- Turf Builder plus Halts™ should be applied when your lawn is dry. It is not necessary to water it at other applications.
- Apply in early Spring before the 1st or 2nd mowing or before temperatures are regularly in the 50's. Rain, snow or freezing weather after application will not affect the performance of the product.
- Do not seed or sod for 4 months after using Turf Builder plus Halts. The crabgrass barrier prevents grass roots from growing.
- Do not use on bare grass lawns.
- Do not apply essential to concrete, stone, clothing or shoes. If concrete cracks break off particles to prevent staining. If necessary, run off with water.

IMPORTANT

WARNING: You may make your lawn lighter by allowing grass clippings to decay. This places a load on the soil and the soil in your lawn for 4 months after application. Heavy raking and/or aeration of the crabgrass barrier and reduce the effectiveness of this product.

SEEDING/SODDING: Please do not apply when seeding or sodding areas until after the 1st mowing.

ACTIVELY GROWING CRABGRASS: This product does not control actively growing crabgrass and will not control grasses.

TIPS ON SPREADING WITH SCOTT'S SPREADERS

- Deep Spreader**
 - First apply 2 header strips.
 - Operate spreader the longest way of the lawn.
 - Overlap strips to ensure even coverage.
 - Shut off granules when you hit or missed the header strips or stopped.
 - Move lawn first if grass is tall enough to touch the bottom of spreader.
- Easy-Cover™ Mower**
 - Shift off gear to the right. Application is automatically made and made when you do.
 - Avoid ruts by making each pass about 30 inches from the previous one so some overlapping occurs.
