OFFICE OF CHEMICAL SAFETY AND POLLUTION PREVENTION

November 27, 2017

Mandy Slack Analyst, Regulatory Affairs The Scotts Company 14111 Scottslawn Road Marysville, OH 43041

Subject: Notification per PRN 98-10 – Revise storage and disposal statement

Product Name: Scotts Halts

EPA Registration Number: 538-192 Application Date: August 7, 2017

Decision Number: 535507

Dear Ms. Slack:

The Agency is in receipt of your Application for Pesticide Notification under Pesticide Registration Notice (PRN) 98-10 for the above referenced product. The Registration Division (RD) has conducted a review of this request for its applicability under PRN 98-10 and finds that the action requested falls within the scope of PRN 98-10.

The label submitted with the application has been stamped "Notification" and will be placed in our records.

Should you wish to add/retain a reference to the company's website on your label, then please be aware that the website becomes labeling under the Federal Insecticide Fungicide and Rodenticide Act and is subject to review by the Agency. If the website is false or misleading, the product would be misbranded and unlawful to sell or distribute under FIFRA section 12(a)(1)(E). 40 CFR 156.10(a)(5) list examples of statements EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product's label, claims made on the website may not substantially differ from those claims approved through the registration process. Therefore, should the Agency find or if it is brought to our attention that a website contains false or misleading statements or claims substantially differing from the EPA approved registration, the website will be referred to the EPA's Office of Enforcement and Compliance.

If you have any questions, please contact Emily Schmid at 703-347-0189 or by email at schmid.emily@epa.gov.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Causes eye irritation. Avoid contact with eyes, skin or clothing. May be harmful if swallowed. Avoid inhalation.

USER SAFETY RECOMMENDATIONS

Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet. Users should remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.

FIRST AID

If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after first 5 minutes, then continue rinsing eye.

If on skin or clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes.

If swallowed: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

If inhaled: Move person to fresh air. If person is not breathing call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible.

Call a poison control center or doctor for treatment advice. Have the product container or label with you when calling poison control center or doctor, or going for treatment.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish. Runoff from treated areas may be hazardous to aquatic organisms in neighboring areas. To protect the environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, gutters or surface waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash pesticide off the treatment area. Sweeping any product that lands on a driveway, sidewalk, or street, back onto the treated area of the lawn or garden will help to prevent run off to water bodies or drainage systems. In case of spills, either collect for use or dispose of properly.

STORAGE AND DISPOSAL

PESTICIDE STORAGE: Store in a dry place. Reseal opened bag [by folding top down and securing.] **PESTICIDE DISPOSAL AND CONTAINER HANDLING:** Nonrefillable container. Do not reuse or refill this container. **If empty:** Place in trash or offer for recycling if available. **If partly filled:** Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

Note to PM: The following Storage and Disposal section will appear on those products intended for use with the Shaker Jug.

STORAGE AND DISPOSAL

PESTICIDE STORAGE: Store in a dry place for your next application. Product can be used until [container is] empty.

PESTICIDE DISPOSAL AND CONTAINER HANDLING: Nonrefillable container. Do not reuse or refill this container. **If empty**: Place in trash or offer for recycling if available. **If partly filled**: Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

DIRECTIONS FOR USE - OPTION #1

Directions for Use

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Where to use

For use on all lawns and grass types except dichondra or bentgrass lawns.

When to use

- Apply in early spring before crabgrass germinates in your area.
- Apply in the fall to prevent moss (except California) or germination of Poa annua, Henbit, Corn Speedwell and Chickweed.
- Apply when the grass blades are dry.
- When crabgrass germinates -or- When to Apply [Optional Crabgrass Germination Map]

[Note to PM: APPLICATION DATES ARE FOR PLACEMENT ONLY AND WILL BE PROVIDED WITH FINAL PRINTED LABEL SUBMISSION]

- January 10 March 10
- March 11 March 30
- April 1 April 20
- April 21 May 10
- May 11 May 30

[With other products

- Does not interfere with the performance of other lawn products such as fertilizers, weed controls and insect controls
- Allow at least one week before applying other products to the lawn.]

With new lawns or seeding

- Do not use on newly seeded lawns until after the fourth mowing. On newly sprigged areas, wait five months before applying.
- Do not plant grass seed for four growing months or sprig for five months after use of this product.

Reapplication

- For areas where crabgrass germinates between January through March (see map [Note to PM: this
 reference will only be made when map is included]), reapply after 8 weeks for best results.
- For goosegrass control, repeat application in 8 weeks.

Bold, italicized text is information for the reviewer and is not part of the label. [Bracketed information is optional text]. Text separated by "/" denotes and/or options.

• Do not apply this product more than twice annually. Allow at least a two month interval between applications.

Restrictions

Do not enter or allow others to enter the treated area until dust has settled. Do not apply this product in a way that will contact any person or pet, either directly or through drift. Keep people and pets out of the area during application.

Staining Note: Can cause staining to cement, stone, metallic surfaces (such as automobiles and garden furniture), closing or shoes. If contact occurs, brush off particles to prevent staining and/or unwanted tracking into the house. If necessary, rinse off with water.

Instructions

- 1. When to Mow
 - If grass is tall enough to touch the bottom of the spreader, mow before application.
 - Mow tall grass a day or two before application.
- 2. How to apply
 - Apply with a drop or rotary spreader when grass blades are dry. For best results, use a Scotts Spreader.
- 3. Set Spreader
- 4. Fill Spreader
 - Fill spreader over bare ground or hard surface.
 - Sweep or brush any particles off of hard surfaces and apply on lawn or dispose of properly.
- 5. Apply Product
 - Apply one or two header strips, then apply product in longest direction of lawn.
 - Shut off spreader each time you reach the header strip, or stop.
- 6. Watering
- It is not necessary to water-in immediately after application. For best results, lightly water the lawn to rinse particles from grass blades (up to $\frac{1}{4}$ to $\frac{1}{2}$ inch) within 2-3 days after application.
 - Rain, snow or freezing weather after application will not affect product performance.
- 7. What to Avoid
 - Avoid heavy raking or aeration of the soil for 4 months after application to prevent disturbing the crabgrass barrier.

This product applies 1.5 lbs. of active ingredient per acre. Maximum application rate of 2.0 lbs. active ingredient per acre.

Note to PM: The following optional claim will be listed on the FPL followed by any or all weeds may be listed below

[Prevents germination] [of the following [X X] [weeds]:

Barnyardgrass Henbit
Corn Speedwell Goosegrass

Chickweed Oxalis (common yellow sorrel)

Crabgrass Poa annua Fall Panicum Purslane Foxtail Spurge

DIRECTIONS FOR USE - OPTION #2

Directions for Use

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Application/Apply

- In early spring, apply when lawn is dry to prevent germination of crabgrass, foxtail, spurge, barnyardgrass, fall panicum, goosegrass*, and oxalis (common yellow woodsorrel).

 *for goosegrass control, repeat application in 8 weeks.
- [Apply] before March 1 in southern California. For best results on thin lawns apply by mid-February.
- [Apply] before mid-March in northern California.
- [Apply in] early Spring (up to time dandelions are in puffball stage) in all other states.
- Apply in the fall (August-October) to prevent moss (except in California), or to prevent germination of Poa annua, Henbit, Corn Speedwell and Chickweed.
- For use on all lawns and grass types except dichondra or bentgrass lawns.
- It is not necessary to water-in immediately after application. For best results, lightly water the lawn to rinse particles from grass blades (up to ½ to ½ inch) within 2-3 days after application.
- Rain, snow or freezing weather after application will not affect the performance of this product.
- This product controls crabgrass in its early stages of growth. This product does not control mature crabgrass and other existing weeds. Growing [-or- Established/Mature] broadleaf weeds can be killed with Scotts® Turf Builder® with Plus2® Weed Control /(insert product name).

Restrictions

- Do not enter or allow others to enter the treated area until dust has settled. Do not apply this product in a way that will contact any person or pet, either directly or through drift. Keep people and pets out of the area during application.
- DON'T/Do not use on newly seeded grass lawns until after the fourth mowing. On newly sprigged areas, wait 5 months before application.
- DON'T/Do not plant grass seed for four growing months or sprig an area for 5 months after use of this
 product.
- DON'T/Do not apply more frequently than twice a year. Allow at least a two month interval between applications.
- DON'T/Do not rake or aerify after application, as the Halts® chemical [crabgrass] barrier in the soil will be disturbed.

Staining Note: Can cause staining to cement, stone, metallic surfaces (such as automobiles and garden furniture), closing or shoes. If contact occurs, brush off particles to prevent staining and/or unwanted tracking into the house. If necessary, rinse off with water.

This product applies 1.5 lbs. of active ingredient per acre. Maximum application rate of 2.0 lbs active ingredient per acre.

Note to PM: The following optional claim will be listed on the FPL followed by any or all weeds may be listed below

[Prevents germination] [of the following [X X] [weeds]:

Barnyardgrass Henbit
Corn Speedwell Goosegrass

Chickweed Oxalis (common yellow sorrel)

Crabgrass Poa annua
Fall Panicum Purslane
Foxtail Spurge

SPREADER SETTING INFORMATION Note to PM: The following are optional formats to present spreader setting information. Appropriate spreader settings, spreader brand names, and coverage will be inserted on Final Printed Label

Note to PM: Application rate is 1.50 lb ai/acre of pendimethalin

Spreader Setting

For best results, use a Scotts Spreader and mow lawn before applying product

Spreading Tips

Apply header strips. Then apply product in longest direction of lawn.

con

Directions
Mow lawn frist; apply 2 header strips; apply longest direction of lawn, overlapping wheel marks
Mow lawn frist; apply 2 header strips; apply longest direction of lawn, overlapping wheel marks
Make each pass about 5 feet from
previous pass to overlap spread width

- Cut Here To Open [Icon Scissors]

PESTICIDAL CLAIMS

[Claims regarding "What it does..."]

- Prevents crabgrass all season long
- A complete crabgrass barrier all season long
- Stops crabgrass before it sprouts
- Delivers pre- and early post-emergent crabgrass control
- Effective pre-emergent control of crabgrass, foxtail, spurge, oxalis, and other grassy and broadleaf weeds
- Prevents crabgrass all season-long
- Single application prevents crabgrass all season-long
- Stops crabgrass before it starts
- Early post-emergent control extends application window
- Halts forms a barrier in the soil which prevents crabgrass, foxtail, spurge, barnyardgrass, fall
 panicum, goosegrass, purslane and oxalis (common yellow woodsorrel) from sprouting and
 appearing above ground level
- Stops crabgrass, foxtail, spurge and 6 other problem weeds before they start
- Prevents crabgrass and other weeds in dormant lawns
- Do not plant grass seed for four growing months or sprig for five months after use of this product
- Apply in spring to prevent crabgrass and problem weeds all season long
- Fall application prevents winter weeds such as [insert any weed from approved weed list]
- Icon of any weed prevented by Scotts Halts

[Claims regarding the fertilizer properties]

- · Contains no fertilizer
- Can be applied alone, or in conjunction with other lawn products
- Prevents crabgrass without a fertilizer application
- Prevents crabgrass without promoting grass growth

"Scotts [to be named] provides a simple, easy to use answer for the toughest lawn problems. Their effective ingredients treat the lawn and control the problem. Scotts [to be named] [contains no fertilizer and] can be used alone, or with other products to solve your lawn problems."

OR

"Scotts [to be named] provides a simple, easy to use answer for the toughest lawn problems. Halts forms a barrier in the soil to prevent crabgrass foxtail, spurge, barnyardgrass, fall panicum, goosegrass, and oxalis from sprouting and appearing above ground level. It [contains no fertilizer and] can be used alone, or with other products to solve your lawn problems."

Bold, italicized text is information for the reviewer and is not part of the label. [Bracketed information is optional text]. Text separated by "/" denotes and/or options.

Scotts Lawn Care Tips

The best weed prevention begins with a complete lawn care program. Tips for a weed-free lawn:

- 1) Feeding your lawn regularly using Scotts Annual Lawn Care Program to help it crowd out weeds and make it difficult for them to establish.
- 2) Mow your lawn at the recommended height. Mowing too short weakens the lawn and allows sun to reach weed seeds.
- 3) Make sure the lawn receives 1-inch per week or water. Weeds thrive in drought conditions, and steal water and nutrients from the grass.

What to expect

- Scotts Halts forms a barrier in the soil to prevent the emergence crabgrass all season-long.
- This product controls crabgrass within a few weeks of germination [-or- in its early stages of growth].
 This product does not control mature crabgrass and other existing weeds.

Growing [-or- Established/Mature/Visible] broadleaf weeds, such as dandelions, can be controlled with products like Scotts Turf Builder with Plus 2 Weed Control.

SUBLABEL 2 – ORNAMENTALS

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Not for use on plants being grown for sale or other commercial use as sod, or for commercial seed production, or for research purposes. For use on plants intended for aesthetic purposes or climatic modification and being grown in ornamental gardens or parks.

Restrictions

- Do not allow people or pets to enter the treated area until dusts have settled. Do not enter or allow others to enter treated areas until watering-in is complete and the soil surface is dry.
- Do not apply this product in a way that will contact any person or pet, either directly or through drift. Keep people and pets out of the area during application.
- Do not use when planting seeds.
- Do not use on lawns.
- Do not apply more than one time every year/12 months.
- Do not treat plants grown for food or feed.
- Do not use treated plants for food or feed.
- This product is not for use on lawns or vegetable gardens

Precautions

- Make sure newly planted areas have been watered and soil is packed around roots of desirable plants before applying Scotts Halts/this product.
- Keep product off of plant leaves. If product is applied to the plant leaves, rinse the leaves with water.
- Avoid unintentional contact of granules with stone, wood, or other porous surfaces as staining may occur. Sweep immediately to avoid staining. If granules are crushed into surface, rinse thoroughly.
- Unusually cold, excessively wet, or hot and dry conditions that delay germination or extend germination over a long period of time can reduce weed control.
- To prevent possible staining to unintended surfaces, ex.: concrete, stone walks, vinyl surfaces, etc., sweep up stray granules as soon as possible.
- Not for use on edible fruit, vegetables or herb areas.

This product prevents weeds from germinating. It does not kill existing weeds. If you have visible weeds, remove them first then rake the soil surface level prior to application. Avoid over application to prevent carryover problems with sensitive plants the following season.

[This product prevents most weeds from germinating for up to 5/6 months in flower [perennial] beds and [around] ground covers, trees and shrubs.]

[Apply this product around perennials, annuals, bushes, trees, and other ornamental plants to have a weed-free outdoor area all season long (or up to 5/6 months). Not for use on edible fruit, vegetable or herb areas.]

[This product controls [problem/unwanted/up to 47/47] weeds and grasses within a few weeks of germination [its early stages of growth]. This product does not control mature weeds and grasses.]

Application

[Option 1]

For Applications near Established Plants [for listed trees, shrubs, perennials, groundcovers, bulbs, ornamental grasses and bedding plants*].

- Apply directly to soil around plants in spring before weeds germinate and before mulching.
- Apply 3/4 oz (2 Tbs) per 10 sq ft.
- Appearance of application should match Example A.

- Activate product by lightly watering-in. [Insert product name] Scotts Halts / this product may be raked into the top inch of soil before watering-in.
- Apply once every year/12 months.
- Apply after planting and watering the area to pack soil around roots.
- *After planting bedding plants, make sure newly planted area has been watered and soil is packed around roots before applying Scotts Halts/this product.

NOTE: Established plants are those that have been planted for more than 2 weeks.

[Option 2]

When 1	o Apply
Established trees, shrubs, perennials, ground covers, ornamental grass, bulbs	 Apply to soil around plants in spring before weeds germinate and before mulching. Wash granules from plants and activate product by lightly watering-in. Apply once every year / 12 months.
Bedding plants	 Apply after planting and watering the area to pack soil around roots. Wash granules from plants and activate product by lightly watering-in. Apply once every year /12 months.
How To	o Apply
Established trees, shrubs, perennials, ground covers, ornamental grass, bulbs	 Sprinkle around plants at a rate of 3/4 oz (2 Tbs) per 10 sq ft. Appearance of application should match Example A.
Bedding plants	Activate product by lightly watering-in. Scotts Halts/ this product may be raked into the top inch of soil before watering-in.

Apply Scotts Halts/the product directly to the soil around ornamental landscape plants to prevent weeds from germinating. Applications where soil is uniformly covered with Scotts Halts/this product will result in best weed control and ornamental tolerance.

NOTE: Established plants are those that have been planted for more than 2 weeks.

^{*}After planting bedding plants, make sure newly planted area has been watered and soil is packed around roots before applying Scotts Halts/this product.

Scotts Halts/this product may be used on plant species not listed on this label. The suitability for such uses should be determined by treating a small number of such plants at the specified rate. Treated plants should be evaluated 1 to 2 months following treatment for possible injury.

ORNAMENTAL GRASSES

Beach grassFountain grassReed, giantFescue, bluePampas grassRibbon grassFescue, sheepReed canary grassTufted hair grass

ORNAMENTAL BULBS

Scotts Halts/this product may be applied for control of susceptible annual weeds in ornamental bulbs listed on the label (crocus, daffodil [narcissus], gladiolus, tulip, etc.). Apply Scotts Halts/this product prior to, during, or after bulb emergence. If weeds have already germinated, use a labeled postemergence herbicide [such as Roundup Weed & Grass Killer III, EPA Reg. No. 71955-33] to control emerged weeds.

WILDFLOWERS

Scotts Halts/this product may be applied for control of susceptible annual weeds in plantings of wildflowers listed on the label (black-eyed susan, California poppy, coreopsis, oxeye daisy, etc.). [Insert product name] Scotts Halts/this product may be applied to established perennial wild- flowers before emergence of weeds or wildflowers. For wildflowers being established from seed, apply Scotts Halts/this product after wildflowers have emerged but prior to weed germination. If weeds have already germinated, use a labeled postemergence product [such as Roundup Weed & Grass Killer III, EPA Reg. No. 71955-33] to control emergedweeds. Due to the diversity of species and varieties which exist in areas where wildflowers are grown, the response to Scotts Halts/this product may vary greatly. Carefully testing on desirable species is recommended to determine if area-wide applications can be made.

WEEDS CONTROLLED OR SUPPRESSED

Use Scotts Halts/this product for preemergence control of the weed species listed. Applications can be made around and over the top of the ornamentals listed on this label.

GRASS WEEDS BROADLEAF WEEDS

Barnyardgrass Burweed, lawn Bluegrass, annual Carpetweed

Crabgrass, large Chickweed, common Crabgrass, smooth Chickweed, mouseear
