Control

- preemergent control of crabgrass, goosegrass, foxtail, chickweed, oxalis, spurge, and Poa annua
- provides controlled-release nitrogen feeding

Net Weight 21 3/16 lbs (9.60 kg)

KEEP OUT OF REACH OF CHILDREN
CAUTION
PRECAUTIONARY STATEMENTS

Hazards to Humans and Domestic Animals: CAUTION, causes eye irritation. Avoid contact with eyes, skin, or clothing. In case of contact, immediately flush eyes or skin with plenty of water. Get medical attention if irritation persists. Wash after handling. May be harmful if swallowed. Avoid inhalation. Do not contaminate feed or foodstuffs. Do not graze treated areas. Do not feed clippings to livestock.

Environmental Hazards: This pesticide is toxic to fish. Do not apply directly to water. Runoff from treated areas may be hazardous to aquatic organisms in neighboring areas. Do not contaminate water by cleaning of equipment or disposal of wastes. In case of spills, either collect for use or dispose of properly.

ACTIVE INGREDIENT:	
pendimethalin, N-(1-Ethylpropyl)-3,4-dimethyl	
-2,6-dinitrobenzenamine*	1.79%
INERT INGREDIENTS:	98.21%
	Total: 100.00%

EPA Reg. No. 538-196

EPA Est 538-OH#1

Fertilizer Plus Turf Weedgrass Control 30-3-9 XXX-XXXX

Guaranteed Analysis

Total nitrogen (N)	30%
0.6% ammoniacal nitrogen	
22.9% urea, methylene ureas nitrogen	
6.5% water insoluble nitrogen	
Available phosphoric acid (P ₂ O ₅)	3%
Soluble potash (K ₂ O)	9%

Derived from: urea, methylene ureas, monoammonium phosphate and potassium sulfate

Directions for use

LEFT COLUMN

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

For use on established turfgrasses including Kentucky bluegrass, perennial ryegrass, fine fescue, tall fescue, bentgrass and Poa annua (except putting greens and tees), bermudagrass, St. Augustinegrass, bahiagrass, zoysiagrass, centipedegrass and blends of these grasses. See "Bermudagrass, Bentgrass and Poa annua Precautions".

Not for use on bentgrass and Poa annua putting greens and tees, or on dichondra.

Prevents sprouting of the following grassy and dicot weeds and provides a controlled-release nitrogen feeding:

Grassy Weeds

- crabgrass
- foxtail
- goosegrass*
- Poa annua
- barnyardgrass
- fall panicum

Dicot Weeds

- chickweed
- oxalis
- prostrate spurge*
- knotweed
- cudweed
- hop clover
- eveningprimrose
- henbit
- purslane

To prevent crabgrass, foxtail, barnyardgrass, fall panicum, Poa annua, cudweed, eveningprimrose, chickweed, oxalis, spurge, henbit and knotweed, apply product to dry foliage at the recommended rate range in the spring or fall before they sprout.

*To prevent goosegrass and heavy infestations of spurge, repeat application at the suggested rate after 6-8 weeks.

To prevent Poa annua, henbit and fall germinating chickweed, apply product to dry foliage at the suggested rate in late summer-early fall before germination. A repeat application after Poa annua treatment should not be made until the following spring.

Apply product uniformly to dry foliage at the suggested rate with a properly calibrated spreader. For best results, water after application (1/4-1/2 inch) to remove granules from the foliage and to move the product to the soil surface for an effective chemical barrier. Do not destroy the chemical barrier created at the soil surface by raking or aerifying subsequent to application. Allow at least a four month span between any two applications except when repeat treatments are necessary after 6-8 weeks.

Do not mow treated area until product has been watered in and turf foliage has dried.

Precautions

Do not use on bentgrass and Poa annua putting greens and tees where it is the desired species, or on dichondra.

Do not apply this product to cool season turfgrasses when temperatures are regularly in th 80's.

This product may cause discoloration and thinning where overapplications have been made if the turfgrass is under severe stress conditions (disease, drought, low temperature - below 40°F, scalping, and excessive soil moisture).

Bermudagrass, 1/2 Inch Height or Taller Bentgrass and Poa annua Precautions

Do not apply to dormant bentgrass and Poa annua (turf that is not actively growing or has experienced frost).

For dormant bermudagrass, an application can be made if it is maintained at a high cut (1/2 inch or more) on medium-fine textured soils such as clays and clay loams.

Where turf thinning or damage has occurred due to winter injury, wait until greenup, fill-in and good rooting before making an application.

Do not apply to bentgrass or Poa annua after late summer.

Application of this product to bermudagrass overseeded with cool season turfgrass species may injure and thin the overseeding.

Other Precautions

Delay seeding by 4 months and sprigging by 5 months after application. Prior to planting, for best results, the soil surface should be disturbed or worked to dilute any remaining chemical residue.

On newly seeded areas, wait until the grass has been mowed at least 4 times and has filled in before making an application.

BEST AVAILABLE COPY

BACK CONTINUED:

Do not apply more than a cumulative total of 226 lbs. of product/acre per year on cool season grasses and 339 lbs of product/acre per year on warm season grasses.

Avoid application to cement, stone, clothing or shoes. If contact occurs, brush off particles to prevent staining. If necessary, rinse with water. If metallic surfaces (golf course equipment, automobiles, etc.) are present at the application site, do not use this product under windy conditions (5-10 MPH) due to its staining potential.

Where turf has been severely thinned due to winter damage, insects, disease, scalping, etc., an application should be withheld until filling-in and rooting of stolons/rhizomes is complete and desired turf density is achieved.

LIMITATION OF LIABILITY

It must be understood that this product has not been evaluated on all bentgrass varieties and Poa annua under all possible growing conditions. The user should exercise judgement and caution when using this product on a given variety until familiar with the performance under his growing conditions. NO WARRANTY OR REPRESENTATION IS MADE, EXPRESS OR IMPLIED, CONCERNING THE RESULTS OBTAINED FROM THE USE OF THIS PRODUCT ON BENTGRASS OR POA ANNUA WHEN NOT USED IN ACCORDANCE WITH DIRECTIONS AND ESTABLISHED SAFE PRACTICES. The exclusive remedy of the user or Buyer, and the limit of liability of The O M Scott & Son Company or any other Seller, for any and all losses, injuries or damages resulting from the use or handling of this product shall be the purchase price paid by the user or Buyer for the quantity of this product involved. The Buyer and all users are deemed to have accepted the terms of this Notice, which may be varied only by agreement in writing signed by a duly authorized representative of The O M Scott & Sons Company.

Storage and disposal

STORAGE: Store in a clean, dry place. Reseal opened bag by folding top down and securing.

PESTICIDE DISPOSAL: Do not contaminate water, food, or feed by storage or disposal. Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL: Completely empty bag into application equipment. Then dispose of empty bag in a sanitary landfill or by incineration, or, if allowed by State and local authorities, by burning. If burned, stay out of smoke.

Suggested Spreader Settings

To provide proper distribution calibrate spreader before application. Do not adjust rates in order to meet fertilizer requirements of your soil.

75 3/4 lbs treats 11,000 ft² (1/4 acre) at the 301 lbs product/acre rate (equivalent to 1.5 lb active ingredient/acre and 2.0 lb N/1,000 sq ft)

<u>SPREADER</u>	<u>GROUND OR PTO SPEED</u>	<u>WIDTH OF COVERAGE</u>	<u>RECOMMENDED RATE RANGE</u>			
			<u>248</u>	<u>301</u>	<u>348</u>	<u>401</u>
Scotts Drop Type	3 mph	overlap wheels	X	X	X	X
Gandy - 30"	3 mph	overlap wheels	X	X	X	X

LEFT COLUMN

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

For use on established turfgrasses including Kentucky bluegrass, perennial ryegrass, fine fescue, tall fescue, bentgrass and Poa annua (except putting greens and tees), bermudagrass, St. Augustinegrass, bahiagrass, zoysiagrass, centipedegrass and blends of these grasses. See "Bermudagrass, Bentgrass and Poa annua Precautions".

Not for use on bentgrass and Poa annua putting greens and tees, or on dichondra.

Prevents sprouting of the following grassy and dicot weeds and provides a controlled-release nitrogen feeding:

Grassy Weeds

crabgrass
foxtail
goosegrass*
Poa annua
barnyardgrass
fall panicum

Dicot Weeds

chickweed
oxalis
prostrate spurge*
knotweed
cudweed
hop clover
eveningprimrose
henbit
purslane

To prevent crabgrass, foxtail, barnyardgrass, fall panicum, Poa annua, cudweed, eveningprimrose, chickweed, oxalis, spurge, henbit and knotweed, apply product to dry foliage at the recommended rate range in the spring or fall before they sprout.

*To prevent goosegrass and heavy infestations of spurge, repeat application at the suggested rate after 6-8 weeks.

To prevent Poa annua, henbit and fall germinating chickweed, apply product to dry foliage at the suggested rate in late summer-early fall before germination. A repeat application after Poa annua treatment should not be made until the following spring.
