CAUTION
PRECAUTIONARY STATEMENTS

Hazards to Humans and Domestic Animals: CAUTION, causes eye irritation. Avoid contact with eyes or clothing. Wash thoroughly with soap and water after handling. If in eyes: Flush with plenty of water. Get medical attention if irritation persists. Harmful if swallowed. Do not contaminate feed or foodstuffs. Do not contaminate water used for irrigation or domestic purposes. Do not graze treated areas. Do not feed clippings to livestock. Do not use clippings to mulch around trees, shrubs, flower beds or vegetable gardens. Keep children and pets off treated areas until material is washed into soil.

Environmental Hazards: Do not apply directly to lakes, streams, ponds or wetlands. Do not apply to steep slopes or when weather conditions favor drift or runoff from target areas.

STORAGE: Store in a clean, dry place. Reseal inner bag by folding top down and securing.

PESTICIDE DISPOSAL: Securely wrap original container in several layers of newspaper and discard in trash.

CONTAINER DISPOSAL: Do not reuse container. Discard container in trash.

ACTIVE INGREDIENT:

Paclobutrazol (+)-(R*,R*)-β-[(4-chlorophenyl)methyl]-2-(1,1-dimethylethyl)-1H-1,2,4-triazole-1-ethanol 1.38%

GROWTH
MANAGER

For St. Augustinegrass

Lawn Growth Regulator plus Fertilizer

How will this product
reduce summertime mowing?

Left Column

Scotts Growth Manager is the result of many years of turfgrass research in Florida, Texas and other areas by a team of Scotts scientists. It was developed to answer the question: "How can I reduce the summertime mowing chore associated with having a beautiful St. Augustinegrass lawn?"

Does this mean I won't have to mow?

No, but with an early summer application, you should be able to skip up to half your mowings over the summer.

Center Column:

Up to 50% less mowing
Here's an example of what you
might expect, based on our testing:

With Growth Manager applied in early summer	6 to 8 mowings
Fertilizer only applied in early summer	12 mowings

Note: You may make one reapplication of Growth Manager when your lawn starts to require weekly mowings.

Right Column:

Less clippings each time you mow
When you do mow, it will be easier to push your
mower because there will be fewer grass clippings.

BACK CONTINUED:

How Does It Work?

Left Column:

The St. Augustinegrass plants in your lawn naturally produce growth hormones that encourage undesirable rapid leaf growth during hot, rainy summer weather. Growth Manager regulates these hormones, without harming the plant, so that upward growth is slowed. Your lawn will appear to be growing in "slow motion".

Center Column:

Why does Growth Manager contain fertilizer?

Growth Manager contains a 29-3-3 fertilizer applied at a "light rate" compared with Scotts Turf Builder_(R) or Bonus S_(R). It may seem contradictory that fertilizer, which helps your St. Augustinegrass grow, is combined with the growth regulator ingredient. Our research testing has proven that the growth regulator works more effectively in combination with fertilizer. The fertilizer also provides essential nutrients your lawn needs during the summer to keep it green and healthy looking.

Right Column:

More questions?

We've answered the most obvious questions about this advanced lawn care product. If you want to get further information, talk directly with one of Scotts Lawn Counselors by simply dialing this toll free number: 1-800-543-TURF.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

APPLICATION

- o Growth Manager should be your second application of the year following a spring application of Bonus S(R) or Turf Builder(R).
- o Apply to dry foliage anytime between Memorial Day and Labor Day when the grass is actively growing and has filled in fully from any winter damage.
- o Water after application (to carry the growth regulator ingredient to the roots).
- o Continue to provide adequate water during periods of extended dry weather to keep your lawn from becoming stressed.
- o Mow the lawn about one week after application. The slowed growth and improved greening will then become visible over the next several weeks. The slowed growth will be noticeable for up to eight weeks and the improved greening for up to 12 weeks. You may reapply Growth Manager once, if desired, (up until Labor Day) when your lawn requires weekly mowings.
- o Do not apply to lawns of zoysiagrass, bahiagrass, bermudagrass, centipede and mixed lawns of St. Augustinegrass/bermudagrass, since Growth Manager will not be effective in regulating the growth of these grasses.
- o Do not apply around vegetable plants, fruit trees, flowers or shrubs. However, application to St. Augustinegrass under the drip zone will not harm trees.
- o For best results, you will get uniform application by using the appropriate Scott spreader setting and referring to "Tips on Spreading" on left side of package.

DIRECTIONS (continued)

SPRIGGING/SODDING

On a newly sodded lawn, delay application until the grass has rooted firmly. On a recently sprigged lawn, delay application until the lawn has completely filled in.

Delay sprigging/sodding for at least one month after an application has been made.

TIPS ON SPREADING WITH SCOTT'S SPREADER

Scotts Drop:

- Mow lawn first if grass is tall enough to touch the bottom of spreader
- Operate spreader the longest way of the lawn (MODIFIED ILLUS. WITHOUT HEADER STRIPS)
- Overlap wheels to insure uniform application
- Shut off spreader at all turns or stops (MODIFIED ILLUS. WITHOUT HEADER STRIPS)

EasyGreen™ Rotary:

- Slide shut-off lever to the right. Application automatically starts and stops when you do.
- Avoid misses by making each pass about 30 inches from the previous one so some overlapping occurs.
- Apply on a calm day.
