Scott's Best Annual Program

Now it's easy for you to have a better lawn

Save money
Why even consider a lawn care service? Scott's Annual Program will give you a beautiful lawn for about one-third the cost.

Simple and easy
No more guesswork. You simply apply the right product one Step at a time.

Start anytime
You can start into the Annual Program anytime of the year. Just check the month and select the appropriate Step listed below.

Guaranteed results
Each Step is designed to the specific season to help give you a greener lawn.

step 1 Early Spring February-April	step 2 Late Spring April-June	step 3 Summer June-August	step 4 Fall August-November
Crabgrass Preventer plus Fertilizer—prevents crabgrass, foxtail spurge, oxalis, chickweed and other annual weeds while providing deep, thick growing for up to 3 months. This is Scott's best fertilizer plus crabgrass preventer. In the Pacific Northwest, Step 1 is "Moist Control plus Lawn Fertilizer". For St. Augustinegrass, Step 1 is "Super Broom 5".	Moist Control plus Fertilizer—controls crabweeds, clover, chickweed and other broadleaf weeds while growing your lawn in up to 2 months. This is Scott's best weed and feed. For St. Augustinegrass, Step 2 is "Super Turf Builder".	Lawn Care plus Fertilizer—controls warm grasses, clover, buck, and volunteer and other weed sprouts plus grows your lawn through the summer.	Lawn Fertilizer—especially formulated for the Fall—the best time to develop a stronger root system for a more vigorous, thicker lawn. Make your lawn green up even quicker next Spring. This is Scott's best fall fertilizer.

step 1 DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

Application
 Apply to dry foliage. It is not necessary to water in after application.

- Apply this product in early Spring before the 4th mowing or before temperatures are regularly in the 60's (See Map). Rain, snow or freezing weather after application will not affect the performance of this product.
- Do not seed or sod for four growing months following application. This product can prevent seeds from germinating.
- On newly seeded or sodded areas, wait until grass has been seeded at least 4 days.
- Do not use on Dichondra, bentgrass or St. Augustinegrass lawns.
- Do not apply to shrubs, flowers or garden seed beds or plants.

- Apply** this product more than once a year. Allow at least 4-6 weeks between applications of any other product in this Program.
- Do not** apply material to carport, stone, clothing, or yourself when applying or grab water.

Raking
 You may rake your lawn lightly to remove grass clippings or debris. But avoid breaking the soil surface in your lawn for 4 months after application. Heavy raking will disturb crabgrass barrier and reduce the effectiveness of this product.

Tips on Spreading
Scott's Drop:
 First apply 2 header strips.
 Overlap spreader application area to avoid strips of unspread lawn.
 Shut off spreader when you reach the header strip or say time you stop.

EasyGreen Rotary:
 Slide shut-off lever to the right, application automatically starts and stops when you do.
 Avoid misses by making each pass about 30 inches from the previous one so some overlapping occurs.

SpeedyGreen Rotary:
 Shut-off spreader as you say stop.
 Avoid misses by making each pass about 5 ft. from the previous one so some overlapping occurs.

Scott's Spreader Settings

Scott's Drop Spreader	Scott's EasyGreen Rotary	Scott's SpeedyGreen Rotary
5	25	3 1/2

Add Detail Spreader Settings (From Scott's spreader settings are approximate. You may need to adjust for proper coverage.)
