Mr. Vincent Snyder, Jr.
O.M. Scott & Sons
14310 Scottslawn Road
Marysville, OH 43041

Dear Mr. Snyder:

Subject: Amendment - Additional Brand Name - General Label Revision -
Confidential Statement of Formula
New Western Lawn Insect Control Plus Fertilizer
EPA Registration No. 538-204
Your Applications Dated July 15 and 27, 1987

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, is acceptable provided that you make the labeling changes listed below before you release the product for shipment bearing the amended labeling.

1. Delete "New" in the product name. "New" is only permitted for 6 months.
2. Revise Note to Physician to read:

Diazinon is an organophosphate insecticide. If symptoms of cholinesterase inhibition are present, atropine sulfate by injection is antidotal. 2-PAM is also antidotal and may be administered, but only in conjunction with atropine.

3. Change "Keep out of lakes, streams or ponds. Do not contaminate water by cleaning of equipment or disposal of wastes" to "Do not apply directly to water. Do not contaminate water when disposing of equipment washwaters."

- 4. The additional brand name listed below, submitted in connection with the above-referenced product registration, is acceptable, and our records have been adjusted to reflect this additional name. This acceptance is given with the understanding that the label for the additional brand name will be like the registered label in every particular except for product name, associated artwork, and you may delete, but not add, sites and pests.

Additional Brand Name

Insect Control Plus Lawn Fertilizer

- 5. The Confidential Statement of Formula is acceptable and has been made a part of the record for this product.

Submit five (5) copies of your final printed labeling before you release the product for shipment.

A stamped copy of the labeling is enclosed for your records.

Sincerely yours,

George T. LaRocca

CAUTION

PRECAUTIONARY STATEMENTS

Hazards to Humans and Domestic Animals: CAUTION. Harmful if swallowed. May be absorbed through the skin. Do not get in eyes, on skin, or on clothing. Avoid inhalation. If on skin: remove contaminated clothing and wash affected areas with soap and water. If in eyes: flush eyes with plenty of water. Call a physician if irritation persists. Wash thoroughly after handling and before eating or smoking. Do not contaminate feed or foodstuffs. Water treated area after application and allow to dry before permitting use.

ACCEPTED
with COMMENTS
in EPA Letter Report

APR 11 1988

Under the Fed.
Pesticide and Fertilizer
Act, amended, this product is
registered under EPA Reg. No.
538-204

FRONT CONTINUED:

Note to Physician: Diazinon is a cholinesterase inhibitor. Atropine is antidotal if symptoms of cholinesterase inhibition are present.

Environmental Hazards: This product is toxic to fish, birds, and other wildlife. Birds feeding on treated areas may be killed. Keep out of lakes, streams, or ponds. Do not contaminate water by cleaning of equipment or disposal of wastes.

STORAGE: Store in a clean, dry place. Reseal opened bag by folding top down and securing.

PESTICIDE DISPOSAL: Securely wrap original container in several layers of newspaper and discard in trash.

CONTAINER DISPOSAL: Do not reuse bag. Discard bag in trash.

crickets	(in dichondra)		

Directions for use

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

LEFT COLUMN

DO apply when insect activity or damage (chewed or browned leaves) is first observed or suspected in the lawn.

NOTE: For Grub Control:

Northern States-The most likely period for grubs is late July through September, but in some cases grubs are active in the spring. An application for spring grub activity requires a repeat summer-early fall application for effective control.

Southern States-Apply during July-August. A second application may be needed six weeks later. Applications made later in the year, when grubs are more mature, are less effective.

For chinch bugs start treatments when daily high temperatures are 80° or above and repeat at 6 week intervals.

For crane fly larvae (leatherjackets) apply when activity is first noticed in the spring, usually mid-March to mid-April.

For chinch bugs start treatments when daily high temperatures are 80° or above and repeat at 6 week intervals.

For mole crickets, the best time to apply is in May to July.

DO apply when lawn is dry. For white grubs and mole crickets, water thoroughly, let lawn dry and then apply product.

DO water lawn *after application* to wash granules from the lawn foliage. If treating for grubs or mole crickets, water thoroughly (so that active ingredients will be carried into the rootzone).

RIGHT COLUMN

DO make a repeat application of a Scotts insect control product (with or without fertilizer) if there are signs of renewed insect activity. (Normally, application gives effective control for approximately 6 weeks.)

DO apply at

Application Rate	Scotts Drop Spreaders	Scotts EasyGreen™ Rotary
(treats 5,000 sq ft)	6	26

DON'T treat just the browned areas of lawn. To prevent further damage, treat entire lawn.

DON'T use any other lawn control product for at least one week after application.

DON'T allow traffic on lawn after application until granules are watered off lawn foliage and lawn has dried.

DON'T use on fruit or vegetable plantings.

DON'T apply with a rotary-type spreader except Scotts EasyGreen™ Rotary, which is especially designed for safe, even application of control products.
